This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

STATISTICS OF POPULATION.

INTRODUCTION	xi–lxvii
Michigan	xii–xxvi
Census Act	xxvii–xxxi
Instructions to Enumerators	xxxii–lxvii
POPULATION	lxviii–lxix
Population of the State	lxviii
Percentage of increase in population of State, 1880, 1884-1890, 1894-1900, 1904	lxviii
Increase of population of the State at each census 1800 to 1904	lxix
Population of the State at each census from 1800 to 1904, with increase, per cent of increase and average annual increase in population during each period	lxix
Discussion of the growth of population of the State	lxix
DENSITY OF POPULATION	lxx–lxxii
Area of the State	lxx
Density of the population of the State, arranged in geographical groups	lxx
Population, with areas, and average number of inhabitants to each square mile, by counties arranged geographically, 1900, 1904	lxxi–lxxii
CENTER OF POPULATION AND ITS MEDIAN POINT	lxxiii–lxxiv
The location of the center of population in 1904	lxxiii
The location of the center of population at the censuses of 1884 and 1894	lxxiii
Location of the median point of population at the censuses 1884, 1894, 1904	lxxiii
Method of determining the center of population	lxxiii–lxxiv
POPULATION OF COUNTIES	lxxiv–lxxvi
Number of subdivisions or counties in the State	lxxiv
Increase or decrease in population of counties from 1890 to 1904	lxxv–lxxvi
POPULATION OF INCORPORATED CITIES AND VILLAGES	lxxvi–lxxxi
Number of incorporated places in the State and how determined	lxxvi
Number of incorporated places in the State, classified by size	lxxvii
Number, population and per cent of total population of incorporated cities, 1864 to 1904	lxxvii
Combined population of the ten large cities having 20,000 inhabitants or more	lxxvii
Change in relative rank of principal cities 1900 to 1904	lxxvii
Population of the incorporated cities of the State	lxxviii
Population of the incorporated villages of the State	lxxix–lxxxi
RURAL AND URBAN POPULATION	lxxxi–lxxxii
Rural and urban population discussed	lxxxi
Rural and urban population, with per cent of total population	lxxxii
SEX	lxxxii–lxxxv
Number and percentage of males and females of total population, 1904	lxxxii
Percentage of males and females of total population from 1874 to 1904	lxxxii
Excess of males over females, with per cent of total population from 1874 to 1904	lxxxiii
Relative increase or decrease in female population	lxxxiii
Percentage of males and females of total population by counties. Comparative tables	lxxxiv–lxxxv
Percentage of males and females of total population in incorporated cities, 1894, 1904	lxxxv

	Page
GENERAL NATIVITY	lxxxv–xcvi
General nativity of the total population of the State 1900, 1904	lxxxv
Population classified as to general nativity, and per cent of total population from 1880 to 1904	lxxxvi
Percentage of native and foreign born of total population, arranged geographically 1894, 1904	lxxxvi
Concentration in the upper peninsula counties of the increase in foreign born	lxxxvii
Relative decrease in the foreign born of the State, arranged geographically 1894 to 1904	lxxxvii
Discussion relative to the increase and decrease in native and foreign born population in the State	lxxxvii
Increase or decrease of native and foreign born population by counties, from 1894 to 1904, 1900 to 1904	lxxxviii-lxxxix
General nativity of the inhabitants of the cities, villages and rural districts	lxxxix
Proportion of the foreign born in the cities as compared with the remainder of the State	lxxxix
Proportion of foreign born population in the cities, villages and rural districts	xc
Proportion of native and foreign born inhabitants in the incorporated cites from 1880 to 1904	xc
The incorporated villages of the State, classified by sex and general nativity	xci–xcvi
COLOR	xcvi–ci
Composition of the white and colored population in 1904	xcvi
Total population of each race and color, with increase and per cent of increase, 1894, 1900, and 1904	xcvii
Per cent of population of each race and color, of total population, 1880 to 1904	xcvii
Population of the State, classified as to race and color, by counties for the years 1890, 1894, 1900 and 1904	xcviii–ci
Percentage of race and color of total population in incorporated cities	ci
AGES	ci–cvii
Aggregate population and each of its elements, distributed by quinquennial age groups, classified by sex, for the State, 1904	cii
White, Negro, Indian, Japanese and Chinese population distributed by quinquennial age groups, classified by sex, for the State, 1904	cii
Discussion relative to the changes that have taken place in the age distribution	cii–ciii
Proportion of the total population at each age period, by per cent of total, and proportion of native and foreign born, 1894, 1904	ciii
Total number and number of each sex, at each age period of the native and foreign born population, 1904	civ–cv
Average age of the total population of the State, classified by sex, 1894, 1904	cvi–cvii
PARENT-NATIVITY	cvii–cxx
Parentage of the inhabitants of the State reported in 1904	cvii
Number and proportion of persons of native and foreign born parentage, 1894, 1904	cvii
Number and proportion of persons of mixed parentage, 1894, 1904	cvii
Parent-nativity of the native and foreign born population in the State, cities and country outside of cities	cviii
Excess of persons having foreign born fathers, over persons having foreign born mothers	cix
Total population whose parent-nativity is reported, number and per cent of native inhabitants of native parentage, to such total, counties	cix–cx
Native population whose parent-nativity is reported, with per cent of each, counties	cxi–cxii
Foreign born population whose parent-nativity is reported, with per cent of each, counties	cxiii–cxiv
Parentage of the inhabitants of the incorporated cities reported in 1904	cxiv
Total population whose parent-nativity is reported, number and per cent of native inhabitants of native parentage to such total, incorporated cities	cxv–cxvi
Native population whose parent-nativity is reported, with per cent of each, incorporated cities	cxvii–cxviii
Foreign born population whose parent-nativity is reported, with per cent of each, incorporated cities	cxix–cxx
CONJUGAL CONDITION	cxx–cxxiii
Conjugal condition of the aggregate population of the State, classified by sex	cxxi
Relative proportion of males and females of each conjugal condition	cxxi
Conjugal condition of persons 15 years of age and over, classified by sex and nativity, *1900, 1904*	cxxii

CONJUGAL CONDITION.—Continued. Page

Percentage of single, married, widowed, divorced, and unknown males and females 15 years of age and over in the State, 1900, 1904 cxxii
Number of divorced and married persons, and percentage of divorced to married in the State cxxii
Conjugal condition of persons 15 years of age and over, in the incorporated cities of the State cxxiii
Number and percentage of single, married, widowed, divorced, and unknown males and females 15 years of age and over in the incorporated cities cxxiii
Number of divorced and married persons, and percentage of divorced to married in the incorporated cities cxxiii

CITIZENSHIP ..... cxxiv–cxxix
Number and per cent of males 21 years of age and over, of total population cxxiv
Males of voting age classified by general nativity, with number and per cent of increase 1894, 1904 cxxiv
Percentage of potential voters of total population, total males and average number of persons to each potential voter cxxiv
Total number, number of native and foreign born males of voting age, and per cent of each to total number 1894, 1904, counties ..... cxxv–cxxvi
The potential voters of the State classified as to citizenship cxxvii
Voting strength of the cities of Michigan, with per cent of same to total male population 21 years of age or over, in the State cxxvii
Males of voting age classified as to general nativity and citizenship for the incorporated cities of the State cxxvii
Total number, the number of native and foreign born males of voting age, and per cent of total number, 1894, 1904, incorporated cities ..... cxxviii–cxxix

MALES OF MILITIA AGE ..... cxxx–cxxxi
Natural militia ages cxxx
Males of militia age, number and per cent, classified by general nativity 1894, 1904 .. cxxx
Increase of males of militia age cxxx
Percentage of native and foreign born of total males of militia age in the State, incorporated cities, villages and rural districts ..... cxxx–cxxxi

PERSONS OF SCHOOL AGE ..... cxxxi–cxxxix
School age in Michigan, and persons of school age in the State, 1900, 1904 cxxxi
Number and per cent of persons in the State of primary school age, classified by general nativity, 1904 cxxxi
Percentage of native and foreign to total persons of school age, counties ..... cxxxii–cxxxiii
Percentage of males and females of primary school age, to total population of each, counties ..... cxxxiv–cxxxv
Persons of primary school age in the incorporated cities cxxxv
Percentage of native and foreign to total persons of school age, incorporated cities .. cxxxvi–cxxxvii
Percentage of persons of school age to total population of each, incorporated cities .. cxxxviii–cxxxix

SCHOOL ATTENDANCE ..... cxl–cxli
Total persons attending school during the census year, classified by sex, in 1900, 1904 cxl
Number of persons of primary school age, school attendance, and per cent of same to total number of persons of primary school age cxl
School attendance reported in the incorporated cities of Michigan cxl
School attendance in the State and incorporated institutions, 1904 ..... cxl–cxli

LITERACY AND ILLITERACY ..... cxli–cxlviii
Definition of literacy and illiteracy as used in the census cxli
Population ten years of age and over in the State, 1904 cxli
Population ten years of age and over, classified as to literacy, with number and per cent cxlii
Illiterate population classified as to degree of illiteracy, 1900, 1904 cxlii
Illiterate population classified by sex and general nativity, 1894, 1904 cxlii
Illiterate population classified by general nativity, by counties, 1904 ..... cxliii–cxliv
Illiterate population classified by sex, general and parent-nativity, 1904 cxlv
Population ten years of age and over in the cities, classified by sex, literacy and degree of illiteracy cxlv
Illiterate population classified by general nativity, incorporated cities ..... cxlvi–cxlvii
Illiterate population classified by sex, general and parent-nativity, in the incorporated cities, 1904 cxlviii

ABILITY TO SPEAK ENGLISH ..... cxlviii–cxlix
Total population ten years of age *and over, classified* as to ability to speak English, with *number and percentages for 1904* cxlviii

ABILITY TO SPEAK ENGLISH.—Continued.	Page
English speaking and non-English speaking persons in the State, classified by sex, 1904	cxlix
Non-English speaking population of the State, classified by sex, with number and percentages of same, arranged geographically	cxlix
English and non-English speaking persons in the incorporated cities	cxlix
DEFECTIVE CLASS	cl–clii
Discussion relative to the classification of defective persons in the State	cl
Number and per cent of defective class in the State, classified by general nativity	cl
Defective class by ages, in periods of years, for the State	cl–cli
The defective class, classified as to sex, general and parent-nativity 1894, 1904	cli
The conjugal condition of the defective class, classified by sex, and general nativity	cli
Defective class in the incorporated cities	clii
MICHIGAN-BORN	clii–clvi
Number and percentage of persons living in State of birth	clii
Number and per cent of Michigan-born to total native population, 1894, 1900, 1904.	clii
Percentage of Michigan-born to total, and native population of the State, arranged geographically	cliii
Number and percentage of Michigan-born, other native born, and foreign born persons in the State, arranged geographically	cliii-clv
Conjugal condition of the Michigan-born population in the State	clv
Michigan-born population in the incorporated cities	clv
Number and percentage of Michigan-born, other native born, and foreign-born persons, in the ten large cities of the State	clvi
AVERAGE NUMBER OF YEARS RESIDENCE IN MICHIGAN AND UNITED STATES	clvi
Average number of years residence in the State and United States	clvi
Average number of years residence in Michigan and United States of the inhabitants in the incorporated cities	clvi
COUNTRY OF BIRTH	clvii–clix
Foreign born population distributed according to countries of birth, 1904	clvii
Greatest per cent of increase in the different nationalities	clvii
Foreign born population, distributed according to principal countries of birth, counties	clviii–clix
DWELLINGS AND FAMILIES	clx–clxii
Definition of dwelling as used in the census	clx
Total dwellings and average number of persons to a dwelling in the State, 1880 to 1904	clx
Definition of family as used in the census	clx
Total number of families and average number of persons to a family in the State, 1880 to 1904	clxi
Total number of dwellings and families, with excess of families over dwellings, by counties, geographically arranged	clxi
Total number of families and dwellings in the cities having 2,500 inhabitants or over, with excess of families over dwellings	clxii
Total number of dwellings and families with average number of persons to each in the ten large cities	clxii
BIRTHS AND DEATHS	clxiii
Number of births in the State and incorporated cities	clxiii
Number of deaths in the State and incorporated cities	clxiii
LIBRARIES	clxiii–clxiv
Total number of libraries in the State, 1894, 1904	clxiii
Number and classification of libraries	clxiii
The general classification of libraries	clxiii
Libraries in the incorporated cities, villages and rural districts	clxiv
CHURCHES	clxiv–clxvi
Discussion relative to church organizations in the State	clxiv
Order of denominations by number of organizations	clxv
Order of denominational families arranged according to number of communicants	clxv
Order of denominations by value of church property	clxvi

LETTER OF TRANSMITTAL.

MICHIGAN.
DEPARTMENT OF STATE,
Lansing, June 30, 1906.

HON. FRED M. WARNER, *Governor:*

SIR—I have the honor to submit herewith the Census of Michigan as of date June thirtieth, 1904.

Very respectfully yours,
GEORGE A. PRESCOTT,
Secretary of State.

STATISTICS OF POPULATION.

INTRODUCTION.

The Michigan State Census for the decennial period ending June thirtieth, 1904, was taken in compliance with constitutional requirement and Legislative Act No. 240 of the Public Acts of 1901, a copy of which follows this introduction. Several new features were introduced in the taking of this census, the most important of which were the new method of appointing enumerators and the introduction of the card system throughout the work. The law of 1901 provided for the division of the state into enumeration districts, and the appointment of one or more enumerators in each district. This law further provided for the appointment of a chief enumerator for cities having a population of twenty-five thousand or over. Likewise under this law the appointment of a chief census enumerator was authorized. The responsibility for this division of the state into districts and for the appointment of enumerators was placed upon the Secretary of State. The general success of this plan is to be found in the completed work, making up Volumes I and II of the census of 1904.

In general, the work of the enumerators selected under the law proved satisfactory. It is a fact, however, that probably five per cent in number of these enumerators should never have received their commissions, owing to their inability to properly perform their work. In the taking of succeeding censuses, this deficiency should be overcome, either by providing more carefully for the instruction of enumerators or by requiring an examination as to efficiency before the commissions are issued to the enumerators. Had a competent instructor been sent into each county during the month preceding the date upon which the actual field work was to begin, to meet the enumerators who were to do the work, greatly increased efficiency would have been secured. Then, wherever it became evident to such instructor that an applicant was unfitted for the work, there would have been ample time to provide a qualified substitute.

A comparison between the use of the card system and the old sheet schedule system in the actual field work is, under the circumstances, difficult to make, because of the ten years' period intervening between the application of the respective systems. It is, however, easy to draw the conclusion that the card system results in greater accuracy. Whether the field work can be done more rapidly under this system is yet a matter of great doubt. But when the work of tabulation was reached, all doubt as to the efficiency of the card system was removed. Thousands of dollars were saved the state because of the rapid work made possible by use of the cards in place of the schedule sheets. In the card system the record of each individual stands by itself and the temptation

to indiscriminately use the ditto marks, the results of which are so plainly evident in all census work in which the sheet schedule is used, is avoided. The geater accuracy of the present census over those which have preceded, may be attributed largely to the use of the card system. This system is explained under the head of "Instructions to Enumerators," which will be found in this volume.

Another difficulty with which the completion of this census has been involved, is the lack of proper room in which to work. Fortunately during the first four months of the work of compilation, Representative Hall, in the Capitol building, was made available through the action of the State Board of Auditors. The fact, however, that this room could be used only for this limited period, made it necessary to complete all the work from the original field cards in this short time, and the proper checking of tabulated results and classifying and grouping of schedules was rendered impossible. The completion of the work from that date, December 15, 1904, because of the hurried work preceding, has been necessarily tedious, owing to the impossibility of finding quarters for a sufficient office force. However, the fact that this part of the work has been performed by a comparatively few clerks has made it easy to fix the responsibility, and has produced results which are absolutely accurate. This seeming delay, it will be found, has made it possible to produce in this volume a distinct and important addition to the statistical history of the state.

MICHIGAN.

Long before any white man had touched the coast of what is now the state of Michigan, or had gazed with covetous eyes on its magnificent forests, wandering tribes of Indians loitered along its shores and lived upon the whitefish with which its crystal waters were teeming and the deer that filled its forests. The headquarters of these wandering tribes was the Sault De Ste. Marie, where the fish were most plentiful. But the Indians were not destined to hold undisputed sway.

As early as the first part of the 17th century two French traders, lured by the game which filled the forests, landed on Michigan shores. Temporary structures were erected from time to time until 1672, when Father Marquette, a Jesuit missionary, founded the first permanent settlement at the Sault De Ste. Marie. From this time on the French, through their grace and ease and tact, as well as their unusual ability to adopt the ways and customs of the Indians, gradually insinuated themselves into the country. But the French were an easy-going people and their colonies did not grow rapidly. The French king did all in his power to aid the colonies, but he seems to have used very little judgment in the methods which he adopted. The colonists came to expect aid in every enterprise which they undertook and were constantly demanding assistance for new ventures. The fur trade, which was their chief occupation, was so restricted that it offered little inducement to the average settler. But beaver were plentiful and the

temptation to overstep bounds and trade with the Indians outside of the limits prescribed by the king of France was too great to be withstood, and as a consequence the more daring fled to the woods. The "coureur des bois" was the name given to these wandering French traders who made their homes with careless indifference in an Indian wigwam or in the open forest, and, in open disregard for law, traded with the Indians whenever and wherever they pleased. The king tried every possible means of doing away with this illegal trade, but the hardy "coureur des bois" were too difficult of access and already too strong in numbers to be easily reckoned with, and the result was only to make them more determined and bold. It was this very element among the French settlers, however, which protected Michigan against English invasion long after it would otherwise have become English territory. These bushrangers had a very accurate knowledge of the country which they held, and with unusual foresight placed trading posts at various strategic points, thus effectively barring the entrance of the Hudson Bay Company from the north and the equally aggressive English from the south. For many years the country was thus preserved and the bushrangers lived their rough, half-savage lives and finally, in most cases, settled down in later life with an Indian wife and raised a brood of dusky children to carry on, in their turn, the same irresponsible, careless sort of an existence.

In 1701 LaMotte Cadillac, recognizing the importance of "The Straits," from both a strategic and a commercial point of view, founded a permanent settlement at Detroit. This marks the true beginning of civil life in Michigan. In spite of the pronounced advantages of its position, Detroit did not increase rapidly in population, and the extreme sociability of the French people prevented their spreading out into the wilderness. Prof. Hinsdale, in "The Old Northwest," tells us that the French had three objects in view in coming to New France, "Religion, dominion, and the fur trade." And consequently wherever they came were found "a church, a military defence, and a trading post. The trader was opposed to settlements because they meant the destruction of his trade. The Jesuit was opposed to them because they meant the destruction of his mission field. The 'voyageur' and the 'coureur des bois' were opposed to them because they meant the destruction of their favorite modes of life. Only the soldier was left and his business was not colonization." The first settlements, and for many years the only settlements in Michigan, were Michilimackinac and the Sault De Ste. Marie. The extreme hostility of the Indians in the region of Lake Erie, as well as the greater length of the route, turned the tide of French emigration towards the north. The English were kept pretty strictly to their territory east of the Alleghanies by the difficulties of the passage across the mountains. Thus were the rich lands of southern Michigan preserved for the energetic American farmer who, overcoming all obstacles, pushed his way into the forests, quickly transforming them into thrifty agricultural districts.

About the middle of the 18th century came the struggle between France and England for disputed territory, in which each hoped to gain dominion over the entire northwest country. The French had become so thoroughly allied with the Indians that in this struggle the latter, with one accord, cast their lots with the French "Fathers," as

they called them. Notwithstanding, in 1760 the English gained the supremacy and agents were sent in all directions to demand allegiance from the French and also from the Indians who pretended to be overjoyed at the outcome of the contest. The posts of Michigan were surrendered and all was outwardly tending towards harmony, when the Indians resenting this haughty invasion of their settlements too thoroughly to yield without a struggle, raised an indistinct murmur of discontent, which soon broke out in the shape of a cunningly planned conspiracy, headed by the chief of the Ottawa tribe. Pontiac, who ruled with absolute sway all the savages of the lake region, was proud, haughty, revengeful and deceitful. Although he pretended to welcome the advance of the English, he was in reality using every art to instigate the savages against them, his efforts culminating in a clever scheme by which all the English posts should be attacked and all the English murdered at one blow. Pontiac himself led the insurrection against Detroit, but in spite of the skillful and cunningly laid out plan, Detroit was saved through a friendly Indian maiden who disclosed the secret, thus putting the English on their guard. All the other posts fell, and not until the treacherous assassination of their chief, Pontiac, did the Indians give up hope of finally regaining possession of their old hunting grounds and the British hold undisputed sway in Michigan.

The English at once endeavored to introduce some system and order into the new country which had fallen into their hands, but it takes more than law to overcome the habits of a century and a half. The French were too inactive and too well satisfied with their present mode of existence to exert themselves to adopt new customs; the forests and streams furnished them with the necessary food and they enjoyed their roving existence too thoroughly to settle down to regular ways and habits. The English had no faculty whatever for pacifying the Indians. They persisted in treating them with a scorn and contempt which the haughty savage resented in the extreme, and all the more because the French had shown him such unusual consideration and courtesy. This difference in the attitude of the two nations towards the Indian was one of the main factors in withholding civilization from the lake country, long after Ohio and Illinois had become flourishing commonwealths.

When the time finally came for the American colonies to resent the interference of Great Britain in the affairs which they had managed to their own entire satisfaction for at least one hundred years, we find Michigan British in ideas and British in sympathies. The Indians, it is true, hated the English and looked back with regret and longing upon the early days when the Frenchmen called them "children," but they hated the Americans far more, and General Hamilton had no trouble in securing their aid. But, in order to use these savage allies to any advantage, it was necessary to allow them to adopt their own methods of warfare. Hamilton, therefore, offered rewards for all scalps which should be brought to Detroit, a plan which showed mercy to neither "age, sex, nor condition."

James Rogers Clark, at the head of a mere handful of heroic American soldiers, pushed his way up through the Northwestern territory *into Michigan*, and succeeded, by a clever stratagem, in making Ham-

ilton his prisoner. Soon after this peace was formally declared between Great Britain and the United States, but the Northwest Territory was held on one pretext or another for nearly twelve years, the British, who were laboring under the mistaken idea that the weak confederacy of states must ultimately fall, hoping to gain their share of the spoils. Not until Wayne's decisive victory over the Indians on the banks of the Maumee and the subsequent treaty of Greenville, did the Americans take possession of the posts of the Northwest Territory. Plans for government were at once talked of and the Ordinance of 1787 was submitted by Rufus King to be the law ruling all territories in the United States. This remarkable document was accepted and the breadth of view and the soundness of judgment which it contains have ensured for it a lasting place among the time-honored documents of our country. The third article of the Ordinance is especially worthy of note on account of the vast influence it has had over the character of Michigan's population. It states, "Religion, morality and knowledge being necessary to good government and the happiness of mankind, schools and the means of education shall forever be encouraged." Movements in favor of education for the common people, to which the Ordinance of 1787 gave a new stimulus, were started from time to time. The land ordinance of 1785 set apart the sixteenth section of land in each township for common schools, and one entire township for the aid of schools and colleges. This was the first step toward providing for the people of the Northwest Territory the system of free education of which the state is now justly proud.

In 1800 the lower peninsula of the present state of Michigan constituted nine-tenths of the county of Wayne, the other tenth being within the boundaries of the present states of Ohio and Indiana. The upper peninsula was, with the exception of the territory in the immediate vicinity of the Sault De Ste. Marie, unexplored country. The census returns for that date show 3,757 people in Michigan, 551 of whom were from Mackinaw county, 2,068 from Detroit, and as many more from within a radius of ten miles of Detroit, and most of the remainder from the banks of the River Raisin within the limits of the present county of Monroe. The highway from Ohio to Detroit passed through Monroe county, and settlements, closely packed together for the sake of protection against the Indians, gradually sprang up along the River Raisin for a distance of eight or nine miles.

The Indians continued to resent more and more the advances of the Americans into their territory and the indifference with which their land titles were cast aside, and they themselves crowded into a smaller and smaller area. They accused the Americans of giving them whisky and then taking an unfair advantage in securing titles to their land. In spite of these internal dissensions the year 1805 saw Michigan cut off from Ohio and Indiana and established as an independent territory, the government to be based on the ordinance of 1787. This territory extended on the west through the center of Lake Michigan north to the intersection with Lake Superior, on the east to the water boundary, on the south to a line due east and west from the extreme southern point of Lake Michigan, and on the north to the international boundary. The first governor to be sent to the new territory was General William Hull of Massachusetts, a man of no experience in frontier life and entirely

unacquainted with conditions which he must meet. Hull's first glimpse of his new dominion must have been a disappointment indeed. Instead of a comfortable settlement, well-housed and prosperous, only the smoking ruins of the town of Detroit and the discouraged inhabitants in a homeless and pitiable condition met his gaze. His first care was to relieve the immediate needs of the people, then he turned his attention towards rebuilding the city. Help from the general government was secured, and Detroit was again laid out and this time on much more generous lines than before. A bank of Michigan was next organized and without authority from the government. However, Hull's attention was soon absorbed by troubles with the Indians, who were a constant source of annoyance and fear to the white settlers already in the territory, as well as a very active agent in preventing others from coming in. At the close of the first decade of the 19th century, the increase in population was only 1,005 or 26 per cent in the entire territory of Michigan. In the American state papers we find that, in December, 1811, the 4,860 inhabitants of Michigan were distributed as follows: 1,340 on the Miami, the Raisin and the Huron of Lake Erie; 2,227 at Detroit, the River Rouge, Ecorse and the Huron of Lake St. Clair, and 1,070 on the Island of Mackinaw and in the scattered settlements. Of the entire population, four-fifths were French and one-fifth American and British. These early settlements, almost without exception, followed the water courses, as the interior was nothing but a pathless wilderness and the water afforded the only means of transportation from one point to another.

In the meantime British agents were doing all in their power to awaken the jealousy of the savages who, with Tecumseh at their head, were soon roused to the point of calling a council and commencing hostilities which they planned to continue until every American was driven beyond the Alleghanies. The overwhelming victory which General Harrison gained over the Indians at Tippecanoe stopped all advances for a time, but the growing difficulties between Great Britain and the United States were soon to culminate in the struggle called the War of 1812. The Indians were only too eager to grasp such an opportunity to drive the Americans out of their territory, and the Northwest was unfortunate in choosing General William Hull to be their leader. As a result of the grossest carelessness and cowardice, the posts of Mackinaw and Detroit were both lost to the British commander. The depredations and atrocities of the Indians during the following month were fearful. The heroic attempts of the Americans to retrieve what they had lost, their forced surrender at Frenchtown, and the frightful massacre following, the recovery of Detroit and the final treaty of peace which was in reality little more than a cessation of hostilities, form a chapter in the history of Michigan which cannot be read by a patriotic American citizen even to this day without a feeling of mingled admiration and pity for that handful of courageous American soldiers who advanced to almost certain death so unflinchingly.

It was at this critical and discouraging period of Michigan's history that Lewis Cass, a young lawyer of marked ability and unusual strength and uprightness of character, became governor of the territory of Michigan. Cass had lived the greater part of his life in the Northwest Territory and understood life on the frontier thoroughly. The fur trade

was still the predominating interest of the people, the majority of whom had neither the energy nor the courage to attempt to make homes for themselves in the forests. In addition to this lack of energy there was deeply implanted in their natures a dislike for self-government which it was extremely difficult to overcome; but Lewis Cass was determined that Michigan should develop into a populous, well-organized, thoroughly American commonwealth, and he turned all his abundant energies in that direction. Michigan was very little known at this time, the general impression being that it was mainly marsh land, entirely unfit for cultivation. This impression was confirmed by the false report of a party of surveyors sent out by the United States government to survey the new territory. Two million acres of land had been set aside as bounty land in order to induce settlers to come to Michigan, but for some unknown reason the surveyors reported the whole of southern Michigan to be nothing but marshes and deserts with scarcely one acre fit for cultivation. Not until 1818 was the public land office secured by the territory, and not until then did Michigan commence its growth as an American settlement.

Another feature most discouraging to immigration was the lack of good roads. Cass was clearheaded enough to realize that there must be a decided change within the territory itself before there could be any hope of Michigan's fulfilling her rich destiny, and he at once set about making the change. His first care was to relieve the distress of the suffering people and to arouse in them a little hope for and interest in the future. He then turned his mind towards pacifying the Indians, not by loading them with gifts, but by gaining their confidence through fair and just treatment, and he soon succeeded in making several treaties with them whereby title was secured to the greater part of the land in southern Michigan. Cass also secured the aid of the government in building a road from Detroit to Chicago, and made plans for the building of several others. In 1817 the first regular Michigan newspaper, the Detroit Gazette, was published and the following year the first steamer on the lakes, the Walk-in-the-Water, came through Lake Erie to Detroit, the same boat astonishing the Indians in 1819 by steaming into Mackinaw Island without any visible means of locomotion. As a direct result of the strenuous efforts of Governor Cass, the population of Michigan almost doubled in the decade from 1810 to 1820, and most of the increase was in the last two or three years of the decade.

Until about this time all of Michigan was contained in the single county of Wayne, which was divided into judicial districts. Cass conceived the idea of dividing the territory into smaller county divisions, and in 1815 Wayne county, which was to be co-extensive with that part of the southern peninsula to which the title was clear, was laid out with Detroit as the county seat. Two years later Monroe county, comprising all of the present county of Monroe together with Lenawee and a corner of Wayne, the south half of Washtenaw and a corner of Jackson, was established in honor of the visit to the territory of the Hon. James Monroe. The village of Monroe was also established the same year under the name of Frenchtown. The next year Macomb county, embracing most of the eastern half of Michigan between the northern boundary of the present county of Wayne and the thumb of the mitten,

and Michilimackinac, embracing all of the lower peninsula north of Macomb, were laid out. Four years later Macomb county was reorganized to consist practically of the same territory which it comprises today. But most of the vast territory remained a wilderness for many years. A little settlement sprung up at Mt. Clemens, a saw and grist mill were erected, and in 1821 a schooner was built to ply between the new town and Detroit. This gave the little village a prestige over the surrounding settlements. The county soon began to increase more rapidly in population and in 1828 a new impetus was given when a government road was built from Detroit through Fort Gratiot to Lake Huron.

A road was built from Detroit to Pontiac in 1818, and in 1820 the county of Oakland was organized with Pontiac as the county seat. Settlers were attracted to this part of the country from the East because of its proximity to Detroit and because of the beautiful openings interspersed thickly with crystal lakes which met the gaze of the eager "land-looker." The class of immigrants who came to Oakland county is worthy of notice, being an intelligent and refined class of New England farmers, who came to Michigan with the idea of working hard to carve out, from the wilderness, homes for themselves and their children. The geographical position of Oakland county gave it unusual political and commercial importance, and in 1827 there were 1,400 people in the county. By 1830 it was fairly well settled, while Pontiac was the center of trade for all the region north and northwest as far as Saginaw.

In 1820 Governor Cass made his memorable trip through the Indian country to the Sault De Ste. Marie, winning friends among the Indians at every point. The country along the water route, from Lake Erie to Lake Huron, had been settled to some extent before this time, but was too much out of the way to increase very rapidly in population. The advent of the steamboat in 1819 drew immigrants to this part of the country, and in 1820 St. Clair county was organized. In the same year the steamer St. Clair was built at Marine City, which is one of the most extensive ship building towns in Michigan today. Two years later Sanilac county, comprising the present counties of Huron, Tuscola and Sanilac, was laid out by proclamation of Governor Cass, thus completing the organization of the country on the east coast of Michigan as far north as the extremity of the thumb.

In 1823 a land office was opened in Monroe for the sale of lands in the southern part of Washtenaw and Jackson counties and the country west of Monroe to Lake Michigan. The difficulty of the stage journey, which was the only way of reaching Lake Erie from the east before 1825, had proved a serious obstacle to the rapid settlement of the new country, but the completion of the Erie canal in that year gave the necessary impetus to immigration, and settlers from New York and New England were soon pushing into the territory. The following year found at least a half dozen steamers plying on the lakes, and the trip from Buffalo to Detroit being made daily. During the year 1825 we find the county of Lenawee organized with Tecumseh, which was the first point of settlement on account of the splendid hydraulic power of the River Raisin at that point, as the county seat. This honor, however, was yielded later after a hard struggle to the newer town of *Adrian on account* of its more central position in the county. Grist

mills were established at both Adrian and Tecumseh at an early date and settlements spread out rapidly from these two points.

In 1826 Washtenaw county, which had been opened to settlers through the territorial road which passed through Ypsilanti, was organized, taking in not only its present territory, but parts of Ingham, Livingston and Jackson counties. By 1830 Washtenaw could boast of 4,032 inhabitants. Soon after the organization of Lenawee county, in 1826, the territory on the west to Lake Michigan was organized into the township of St. Joseph and attached to it. The oak openings found through this portion of the state were especially attractive from an agricultural point of view, and consequently, although there were but few inhabitants there at that time, St. Joseph and Cass counties were formally organized in 1829, and schools, postoffices and grist mills were soon in active operation. Ingham county, with its present boundaries, was also organized the same year. By 1830 the population of the state had increased to 31,639, an increase of 260.9 per cent as compared with the 84 per cent of the previous decade.

In 1831 Berrien county, to which settlers had come in 1829, was organized. The same year the government land office was removed to White Pigeon, and in 1834 to Kalamazoo. This marks the beginning of the active settlement of western Michigan. In 1830 a rough road was built from Ann Arbor to the village of Jackson, over which the hardy pioneers pushed their way. They found an abundance of hay in the marshes and plenty of wild game in the forests, but the nearest grist mill, to which it was necessary to make occasional laborious trips, was situated at Dexter in Washtenaw county. This prevented rapid settlement, but two years later a saw mill was established and Jackson county was organized. The same year Kalamazoo county was organized, and Van Buren established and attached to Cass, although not formally organized until 1837. Settlement in Calhoun county began in 1830 at the junction of the rivers, Marshall being the first point of settlement and Kalamazoo the second. Soon the territorial road was built and other roads marked out, and, in 1833, both Calhoun and Branch counties were organized. The organization of the lower tier of counties in Michigan was completed in 1835 by the organization of Hillsdale county, and the second tier by the organization of Van Buren in 1837. The spirit of enterprise which characterized the first half of the decade did much toward the improvement and rapid settlement of southern Michigan.

As early as 1832 the population of Michigan had increased to such an extent that the question of admission into the Union as a state began to be agitated. According to the Ordinance of 1787, 60,000 inhabitants were necessary before a territory could apply for admission, and this number the people of Michigan expected to have before the following year. An epidemic of cholera, however, caused such depredations in 1833 that all thoughts of statehood were turned aside until 1834, when the census showed 87,278 inhabitants. Steps were at once taken to form a state government and to mark off the exact limits of the new state, but a dispute with Ohio arose concerning the southern boundary. Both states refused to yield their right to the strip of disputed territory, and Congress, in turn, refused to admit Michigan into the Union as a state until the question was settled. Finally, in order

to bring an end to the difficulty, Congress offered Michigan the upper peninsula instead of this narrow strip of land, but, at a convention held at Ann Arbor in 1836, the offer was refused. It was soon seen, however, that nothing was being gained by the delay, and early in 1837 Michigan, enriched by the valuable mining districts of the upper peninsula, was admitted into the Union as the twenty-sixth state, and Stephen T. Mason was chosen governor.

The Saginaw Valley had been a point of attraction for settlers for several years on account of its fine location at the head of the bay, but as yet it was very difficult of access, the only route being an exceedingly rude path from Detroit through Flint. A few of the more far-seeing of the pioneers felt sure that a large city was to grow and flourish upon this site, but it was hard to make the many feel that the uninviting marshes, of which most of the valley was composed, would ever be of value. The spirit of speculation had set in however by 1835 and Saginaw county was organized. Soon a "wild cat" bank was established, a steamer arrived and city lots were sold at fabulous prices. Allegan and Lapeer counties were organized the same year, the latter including more townships on the north and east than it does at the present time. The year 1836 marks the organization of Livingston, Genesee and Kent counties. Immigrants came into Livingston county over the Grand river road, attracted largely by the grist mill which was situated at Brighton. Kent county had been settled largely by settlers who came through Grand Haven, the gateway to the northern part of Ottawa county. This had been the headquarters of twenty trading posts established by the American Fur Company in 1827, but immigration, in the true sense of the word, did not begin until 1833-4, from which time Grand Haven has stood for development along the Grand river. At this time two small saw mills, near the village of Grand Rapids, met all demands. As only prairie roads led to the interior, the only market was Chicago, then a city of about 2,000 inhabitants. In 1837 Ottawa county was organized, although all the southern part was a wilderness for some time to come. In the same year the counties of Eaton, Shiawassee, Van Buren and Ionia were organized. Bellevue, in the southwest corner of Eaton county, was opened to settlement by a road built through from Battle Creek in 1835. The lime quarries underlying one section of land were an attraction and some attempts were made to ship the product that same year, but these proved a failure on account of the cost of shipping. The heavily timbered lands in the northern part of the county attracted lumbermen in 1835-6, and the manufacture of pot and pearl ash and saleratus added greatly to the clearing up of the land. Charlotte was made the county seat in 1838. In 1833 the Dexter colony, following an Indian trail which was practically the present Grand river road, pushed their way into Shiawassee county. Owosso was laid out at the fork of the river in 1835 and a few months later was made the county seat of Shiawassee county. The first settlers had entered Van Buren county from Cass, thus settling the southern part first. Later the territorial road opened the country to settlers from the east and it was detached from Cass. Ionia county owes its settlement at this time to the famous Grand river road. The next counties to be organized were Barry and Clinton in 1839, completing the four southern tiers. Settlement in Barry did not

begin until late in the decade, when its rich soil attracted settlers from Calhoun and Kalamazoo counties. The settlement of Clinton county, however, began much earlier. A road was cut through from Ann Arbor in 1833, intersecting the Dexter road in Shiawassee county, but poor accommodations and poor roads made settlement slow until 1837, when schools, mills and roads were established and the rush began.

Immigrants were now pouring into the state in a continuous stream overland and every steamer which crossed Lake Erie to Detroit was crowded. As a result of this rush for land, prices rose with astonishing rapidity. The people became excited at the prospects which seemed to be opening up before them, and the rulers of the new state, forgetting prudence, plunged madly into extensive schemes for internal improvements. Three great systems of railroads, the Southern, Central, and Northern, were planned, and the Central was constructed as far as Kalamazoo. All three were sold to private corporations in the early forties. But the people themselves were wealthy in nothing but the ability and energy to produce, and as the demand for money to carry on the plans of the government became pressing, the simple plan of making more money was put into operation. Banks sprang up as if by magic in every part of the state and the country was flooded with bank notes of every description. A suspension of specie payment was tried and then, to relieve the pressure, the government prescribed the homeopathic dose of unlimited banking or "wild cat" banking, as it was popularly termed. The situation reached a climax at the end of the decade when only six banks were doing business and over forty were in the hands of receivers. The great works of internal improvement were at a standstill for lack of funds, and a general panic prevailed throughout the state. But money difficulties could not stop the swift stream of immigration at once and the population of the state continued to increase for some time at a marvelous rate, the census of 1840 showing 212,267 people, an increase of 570.9 per cent over the previous census.

After the terrible financial disasters and business failures of '37-8-9, the people found themselves in an almost destitute condition. All their property was represented by land, not an acre of which could be sold for more than a mere nominal price, but the shock seemed to have awakened them to the realities of the situation and, with one accord, they turned their minds and hearts towards building up their shattered fortunes. The next ten years were spent in honest toil and earnest endeavor to lay a firm foundation for a great and glorious commonwealth. The age of wild speculation for Michigan was past. During this trying period the stream of immigration almost ceased and settlements spread out very slowly. It was during these years that Dr. Douglas Houghton did such great service for the state by his invaluable explorations and surveys of the upper peninsula. As early as 1826 a large part of the peninsula was organized as Chippewa county, with the Sault De Ste. Marie as county seat, and in 1843, nearly twenty years later, it was reorganized to consist of much less territory, but still more than at the present time. A few settlers had wandered into the county of Delta by this time and it was organized the same year. Two years later Houghton county, with Schoolcraft, Marquette, Ontonagon and Keweenaw counties attached to it, was organized. This section of the country was almost of no value for agricultural purposes,

but the indications of rich mineral wealth were evident at every turn. The natural waterway, too, offered great advantages and the necessity of a canal through the Sault to connect the great lakes had been seen and urged upon the people as early as 1837. Appropriations for this purpose were made and work actually begun, but difficulties with the United States government officials caused the work to be abandoned and for the next fifteen years the people of Michigan were too busy building up their personal fortunes to think seriously of building a canal in the northern wilderness. The copper range of Ontonagon county was carefully looked into by Dr. Houghton in 1845, and within the next few years mining companies, composed mostly of Boston capitalists, sprang up throughout the county. The first actual copper mining to be done in the upper peninsula, however, was off Keweenaw Point some time before this. In 1846 Ontonagon county was given a separate organization. In the lower peninsula only two counties, Tuscola and Montcalm, were organized during this period, Tuscola being detached in 1845 from Oakland county, and Montcalm in 1850 from Kalamazoo. The census returns of 1850 show a falling off of 486.6 in the percentage of increase, the population of the state being only 397,654, which was an increase of 87.3 per cent over the population of 1840.

Next to agriculture, the lumber industry, the active development of which began about this time, was now attracting the most attention. Its distribution was determined by the rivers and railroads. The first operations of importance were in the Saginaw valley, where a sawmill was in operation in 1837, although, on account of the business depression, nothing of importance was accomplished until 1846. Soon sawmills began to multiply at all accessible ports, and lumber camps appeared on all the tributaries of the Grand, St. Joseph and Saginaw rivers. These smaller streams soon became fairly black with logs floating down to convenient mills, and the wilderness became a veritable hive of industry. The difficulty of navigating the river above Bay City was responsible for the placing of stations below that point. In 1855 Midland county was detached from Saginaw, and by 1857 the citizens of Bay county were demanding a separate organization while Saginaw county was as vigorously objecting to the loss of the head of Saginaw Bay from her domain. Bay county gained her point, however, and was duly organized. Lumbermen were soon working their way into various points along the shore of Lake Huron, and Alpena county was ready for organization in 1857.

The so-called Grand Traverse region was comparatively isolated, being off the regular route of immigration. Little was known about this part of the state and rumors of its rigorous climate kept settlers away for some time. Then, too, there was no access by land and navigators were afraid to enter Grand Traverse Bay before the government survey. Besides all this, the Indians had a large reservation there and also every alternate township of land had been granted to the railroads for a subsidy. Late in the forties a few pioneers, lured by the beauty of the scene, formed a little settlement at the head of the bay. This was the beginning of Traverse City. In 1851 Grand Traverse county was organized with Boardman's Mills as the county seat. Newaygo and Marquette counties were also organized the same year, *Newaygo* representing the lumber interest and Marquette both lumber

and the new iron range which had been discovered by Dr. Houghton in 1845. This discovery opened up another large region of the upper peninsula to rapid settlement. A party of Jackson capitalists started a company in 1849 for the mining of iron in the Marquette range, but from lack of transportation facilities none was shipped until 1856, the year after the completion of the Sault canal. The Marquette iron region extends a distance of forty miles from the city of Marquette to L'Anse.

Several fishermen had been attracted to the district around the straits of Mackinac in 1851 and a few of them had remained and become permanent settlers. Soon a little village was started at Harbor Springs and, in 1853, the counties of Emmet and Cheboygan were organized. The growth of this part of the state has always been slow, however, on account of the lack of ready access to the markets. Two years later the four counties of Gratiot, Oceana, Mason and Manistee were organized, the last three bordering on the lake and valuable for their lumber. On account of its peculiar geographical position, the county of Gratiot remained a wilderness until 1850 and there was no road into the county until four years later. In 1855 St. Louis, Ithaca and Alma were platted, and the so-called "graduation act" was passed, whereby the price of land in Gratiot and Isabella counties was reduced to fifty cents per acre for actual settlers, thus preventing speculators from buying up the land. The result was a rush of immigration into Gratiot and no surplus of provisions to accommodate the large and sudden increase of people. From 1854-60 there was terrible suffering from privation and want and the county was nicknamed "starving Gratiot" in consequence. During this period there were 5,000 people in Gratiot county and no surplus of provisions within fifty miles. Gradually, however, supply and demand found their proper level, the people became comfortable and prosperous, and today Gratiot county is considered one of the best counties in the state of Michigan.

Isabella county was opened by a road from Gratiot in 1854 and the next year settlements were made on the site of Mt. Pleasant. A large part of the county was given over to an Indian reservation, and the remainder of the land withheld from market until 1863, although the organization took place in 1859.

Muskegon, Mecosta and Huron counties were organized the same year, Muskegon being opened by a road to Ravenna connecting with the Grand Rapids road. During this decade, in 1854, the first state census, under the present law, was taken. Of the forty organized counties at that time, twenty-one contained more than 10,000 inhabitants. At the close of the decade the entire population of Michigan was 749,113, an increase of 88.3 per cent over 1850. The time of phenomenal growth for Michigan was over with the financial ruin of the late thirties, and hereafter she was to know only a good, healthy increase.

Keweenaw county was detached from Houghton and given an organization of its own in 1861. A rich portion of the copper belt extends through Keweenaw, and the comparatively easy access to the harbor on the north caused the early miners to consider this their headquarters. Veins of copper were plainly visible near Copper Harbor, and, in 1846, speculators flocked in. These veins proved to be a disappointment, however, and the town gradually fell into decay. In 1863

Menominee county was detached from Delta and organized, although there were but few settlers there at that time. Thirty years earlier a saw-mill had been put in operation and lumber floated down the river and out into Green Bay on rafts, but this had proved unsuccessful on account of the low price of lumber and the difficulty in getting it to market. A road was built from Masonville to Marquette in 1864 and, in 1865, the Menominee River Lumber Company was organized. Two counties in the Grand Traverse region, Antrim and Leelanau, were organized in 1863. The settlement of Leelanau county dates back to 1847, when a man in search of health settled at Glen Arbor. The following year a mission was started at Northport and, in 1849, a settlement was made at Elk Rapids. Its growth was very slow, however, and not until 1852 was the city laid out. Three years later new and enterprising hands took hold of the old saw-mill and to this fact is due the subsequent advance and success of Leelanau county.

The whole country was now passing through the most terrible experience in its history. The great War of the Rebellion was at its height and Michigan, under the able leadership of Austin Blair, was doing her full share for the preservation of the Union. More than 90,000 of her best men took part in the struggle and many thousands died on the field. It was many years after this before the people of Michigan had the heart or courage to do much towards the industrial advancement of their state. The usual effects of war, run-down farms, immorality in every possible form, lack of method, etc., were to be seen on every hand. An advance was made in some directions, however, during this decade. Attempts had been made, at various times, to manufacture salt in Michigan, as the salt licks found in many places in the lower peninsula gave indication that salt beds of more than ordinary productiveness were there ready to be utilized. The first operations of importance were carried on in the Saginaw valley in the early sixties, but although the mines were worked and much salt produced, the venture was not a financial success for more than ten years. The process was much less expensive than it would otherwise have been, from the fact that the mills were close to the saw-mills and the refuse lumber was used for fuel to evaporate the salt as well as for material for making barrels in which to put the finished product. The success of this important industry materially aided the growth of Saginaw.

Another industry which had reached large proportions at this time was fishing. In the decade from '40 to '50 fishing was an important industry at the prominent lake ports, and in the next decade the process of preserving fish indefinitely by freezing was discovered, giving a strong impetus to the industry. This had a strong influence in the building up of the lake port cities.

Not until 1869 did Michigan recover herself sufficiently from the ill effects of the war to turn her attention to the building up of the state. In that year five counties, Alcona, Charlevoix, Benzie, Wexford and Osceola, were organized, the last four named being taken from the old county of Michilimackinac. The county of Benzie had been brought to public notice in a peculiar manner in 1854 when a sailing vessel caught in a gale was driven by chance into the mouth of the Betsey river. The captain of the vessel was so delighted with the location that a settlement was made and a postoffice opened in 1860. Two years later

a road was cut through from Benzonia to Bear Lake and Manistee, and the next year another to Traverse City.

The census of 1870 showed a population of 1,184,059, an increase of 58 per cent over the population of 1860.

The splendid pine timber lands in the northern part of the lower peninsula were gradually being opened up by lumbermen and by 1870 Michigan stood at the head of the lumber producing states of the Union. There were few settlers, in the usual sense of the word, in this part of the country, as the tall, bleak pines offered little inducement to immigrants who could go just a little farther west and find all the rich farming country they could possibly wish for. The railroads had not yet opened up this northern country to even comparatively rapid settlement. Extensive lumber operations, however, were opened up in Roscommon, Gladwin and Clare counties in 1871, and in spite of the scarcity of inhabitants the counties of Lake, Missaukee, Kalkaska, Presque Isle and Clare were organized the same year, and Ogemaw, Otsego, Roscommon and Gladwin in 1875. In the latter year Baraga county was detached from Houghton and organized separately. This part of the upper peninsula had been known to explorers from the earliest period and Father Frederick Baraga established a mission station there in 1834. Slate quarries were opened in 1872, but either ignorance or miscalculation caused the attempt to prove a failure. It was expected that a railroad would be completed as far as L'Anse about this time and settlers flocked in, in consequence, but the bubble burst and the town seems to have been practically dead from that time in spite of the marked advantages of its position. The last county to be organized during this decade was Crawford county, which was organized in 1879. By 1880 there were 1,636,937 people in Michigan, an increase of 38.2 per cent in ten years. In 1881 Oscoda and Montmorency counties were organized, and Arenac two years later. Schoolcraft county, which had been organized in 1871, although consisting of as rich an agricultural district as any in the southern peninsula, remained a wilderness until ten years ago, when the D. M. & M. railroad passed through. In 1885 Alger county was detached from Schoolcraft and organized by itself, and Iron county was organized from Marquette and Menominee. Two years later Gogebic and Luce counties were organized, Gogebic being taken from Ontonagon, and Luce from Chippewa and Mackinac. The Gogebic iron range and the Colby mine at Bessemer were first opened up in 1883 and Gogebic county, taken from Ontonagon, was organized in 1887.

The organization of Dickinson county, in 1891, from Marquette, Iron and Menominee, forms the last chapter in the history of the organization of counties in Michigan.

The history of Michigan during the last twenty years is the history of her great industries. The great pine forests have gradually been cleared away until none are now left below Grand Rapids. The last pine timber in the region of the Grand floated past Grand Rapids to Lake Michigan in 1890, and in the same year several mills in Muskegon suspended operations. The prosperity of western Michigan, however, is not dependent upon her pine timber. Grand Rapids furniture is well known the world over, while Muskegon is a thriving business town and Manistee is situated over valuable salt wells. The so-called Michi-

gan fruit belt extends north as far as Traverse City, and the western portion of Oceana county is becoming one of the best fruit-producing regions in the state. The lumber products of the Saginaw Valley are not as extensive as in former years, but Saginaw has her great salt wells and her coal mines which have been worked only in recent years. The beet sugar industry, too, has its headquarters in the Saginaw Valley. This is a new industry since 1890, but it has steadily increased and has already added materially to the wealth of eastern Michigan. The upper peninsula has untold wealth in her mines as well as in her quantities of splendid timber. Improved methods of mining have been responsible for the working to great advantage of the smaller mines and the large ones seemingly have an inexhaustible supply of ore. Calumet and Houghton, in the vicinity of the great Calumet and Hecla copper mines, and Marquette and Ishpeming in the region of the great iron mines have grown to be flourishing cities, while Escanaba and Menominee are great lumbering towns.

One of the noticeable tendencies of the times has been the rush of population to the cities and the corresponding decrease in the population of the country districts. The growth of Michigan cities was very slow during the early years of settlement. Agriculture was the chief occupation of the people and there was no occasion for crowding together. According to the census returns of 1864 we find that at that time there were only nineteen incorporated cities, and that these contained 16 per cent of the total population of the state; twenty years later there were forty-nine incorporated cities containing 27 per cent of the total population of the state; and, in 1894, the number of cities had increased to seventy and the aggregate population to 821,051, or 37 per cent of the entire population of the state. At the present time there are eighty-seven incorporated cities in Michigan with an aggregate population of 1,036,249.

The overproduction caused by the phenomenal building of railroads from 1883 to 1893, opening up a territory in Russia equal to all Europe, besides vast regions in North and South America, Australia, India, Queensland and Ontario, all of which are great exporters of wheat, caused great depression in agriculture and a consequent influx of people to the cities from the farms. Gradually, however, the market found its level and the farmer became more prosperous, but the tide still advances towards the cities where great manufacturing activities are at their height. Although the valuable timber of the state is rapidly disappearing, her agricultural resources, the wealth of her mines, and the extent of her manufactures are increasing daily, giving ample assurance even to the most pessimistic observer that Michigan is destined to hold for many generations the high place which she has made for herself among the states.

CENSUS ACT.

The taking of the census is provided for by Article 4, Section 4, of the Constitution of 1850, supplemented by an act of the Legislature of 1901.

This act, No. 240 of Public Acts of 1901, approved June 7, 1901, reads as follows:

AN ACT to provide for taking the census of this State for the year nineteen hundred four, and once every ten years thereafter.

The People of the State of Michigan, enact:

When census taken.

SECTION 1. A census of the population, of deaths, and of the manufacturing, mining, mechanical and agricultural products of this State shall be taken in the year nineteen hundred four, and once every ten years thereafter.

Duty of Secretary of State relative to.

SEC. 2. It shall be the duty of the Secretary of State to superintend and direct the taking of the census herein provided for, in accordance with the provisions of this act, and he is hereby authorized to establish in his office a division of census, and to appoint a chief of said division who shall receive a salary at the rate of fifteen hundred dollars per year. The Secretary of State may also appoint as many temporary clerks for said division as may be necessary to carry out the provisions of this act: *Provided,* That said division of census shall not be established nor appointments made under this act before the first day of January, nineteen hundred four, and that said division shall be abolished when the census herein provided for is completed.

Proviso.

How information collected.

SEC. 3. The information required by this act shall be collected by enumerators, as herein provided.

Census schedule, population.

SEC. 4. The census schedule relating to population shall comprehend for each inhabitant the name, age at last birthday, sex, color, conjugal condition, place of birth and place of birth of parents, whether alien or naturalized, number of years resident of this State and of the United States, occupation, literacy, school attendance, ownership of farms and homes, physical condition, whether insane, epileptic, idiotic, deaf and dumb, or blind. The aforesaid schedule shall also designate the heads, husband and wife, of each family, and shall contain inquiries as to the relation of each person enumerated to the heads, husband and wife, of the family, whether son, daughter, servant, boarder, or other; also inquiries as to the whole number of births by sex, and the whole number of deaths occurring during the census year.

Mortality. The schedule relating to mortality shall comprehend for each decedent the name, age at last birthday, sex, color, conjugal condition, place of birth, and birthplace of parents, occupation, and, if born within the census year, the date of birth, physical condition, whether insane, epileptic, idiotic, deaf and dumb, or blind, cause and date of death, the place where such death occurred, and time of residence within this State of each and every inhabitant whose death occurred within the census year. The schedule relating to agriculture shall comprehend the following topics: Name of occupant of each farm, color of occupant, tenure, acreage, value of farm and improvements, acreage, yield and value of the various farm products, acreage of growing crops, wages paid farm help, and number and value of live stock. The schedule relating to mining, and to manufacturing and mechanical establishments, shall embrace the name and location of each corporation, company, or individual owning or operating each mine, or establishment or productive industry; date of commencement of operations; character of business, product, or kind of goods manufactured; amount of capital invested, both real and personal; character and quantity of power used; character and number of machines used; number and sex of employees, and the amount of their wages; kind, quantity and costs of materials used in manufactures; quantity and value of products and time in operation during the census year. The Secretary of State may, in his discretion, add to the census schedules inquiries of special importance, not named in this section.

Agriculture.

Mining.

Enumeration districts, etc. SEC. 5. For the purpose of the enumeration herein provided for, the Secretary of State shall divide the State into such enumeration districts as he may deem most convenient for carrying out the provisions of this act and shall appoint one or more enumerators for each district. Said enumerators, so appointed, shall, within ten days after such appointment, take and subscribe the constitutional oath of office, and file the same with the Secretary of State. The enumerators shall take the census and statistics required by this act, as of date June first, nineteen hundred four. They shall commence the enumeration on the first day of June, nineteen hundred four, and each enumerator shall prosecute the canvass of his district from that date forward on each week day without intermission, except for sickness or other urgent cause; and any unnecessary cessation of his work shall be sufficient cause for his removal and the appointment of another person in his place. It shall be the duty of each enumerator to complete the enumeration of his district on or before the first day of July, nineteen hundred four.

To take oath. Census and statistics.

When to commence.

Cause for removal.

When to complete.

What enumerator to collect. SEC. 6. Each enumerator shall be charged with the collection, in his district, of facts and statistics required by the population schedule, and such other schedules as the Secretary of State may determine shall be used by him in connection with the census, as provided in section four of this act.

Duty.

It shall be the duty of each enumerator to visit personally each dwelling house in his district, and each family therein, and each individual living out of a family in any place of abode, and by inquiry made of the head of each family, or of the member thereof deemed most credible and worthy of trust, or of such individual living out of a family, to obtain each and every item of information and all particulars required by this act. In case no person shall be found at the usual place of abode of such family, or individual living out of a family, competent to answer the inquiries made in compliance with the requirements of this act, then it shall be lawful for the enumerator to obtain the required information, as nearly as may be practicable, from any reliable source; and it shall be the duty of each enumerator to forward, within ten days after completing the enumeration of his district, the original schedules, duly certified to the Secretary of State, as his returns under the provisions of this act; and in the event of discrepancies or deficiencies being discovered in his said returns, he shall use all diligence in correcting or supplying the same. In case the district assigned to any enumerator embraces all or any part of any incorporated city or village, and also other territory not included within the limits of such incorporated city or village, or either, it shall be the duty of the enumerator of such district to clearly and plainly distinguish and separate upon the population schedules, the inhabitants of all or any part of such city or village as may be embraced in the district assigned to such enumerator, from the inhabitants of the territory not included therein. Whenever it shall appear that any portion of the enumeration and census provided for in this act has been negligently or improperly taken, and is by reason thereof incomplete and erroneous, the Secretary of State may cause such incomplete and unsatisfactory enumeration and census to be amended or made anew under such methods as may, in his discretion, be practicable.

To forward schedules to Secretary of State.

Duty in case of discrepancies, etc.

When census may be made anew, etc.

Compensation of enumerators.

Who to issue warrant.

When issued.

Proviso.

SEC. 7. Each census enumerator shall receive, as full compensation for services performed under this act, three dollars per day of ten hours; and the amount due each enumerator shall be calculated at the rate aforesaid by the Secretary of State, which amount shall be paid by the Treasurer of the county in which the enumeration district is located, upon a warrant from the Secretary of State. No such warrant shall issue, however, until each enumerator shall have forwarded to the Secretary of State a sworn statement, showing the actual time he was engaged in canvassing his district, and the amount he claims is due him for such services: *Provided*, That in cities having a population of twenty-five thousand or over, the Secretary of State may appoint a chief census enumerator at a salary of five dollars per day for the time he is actually engaged in supervising the taking of census of his city.

Penalty for neglect, etc.

SEC. 8. Any enumerator who, having taken and subscribed the oath required by this act, shall without justifiable cause, neglect or refuse to perform any of the duties enjoined on him by this act, or who shall without the authority of the Secretary of State, communicate to any person not authorized to receive the same, any information gained by him in the performance of his duties, shall be deemed guilty of a misdemeanor, and upon conviction shall be punished by a fine not exceeding one hundred dollars, or imprisonment in the county jail not exceeding thirty days, or both fine and imprisonment in the discretion of the court; or, if he shall wilfully and knowingly make false certificates or fictitious returns, he shall be deemed guilty of a misdemeanor, and upon conviction, shall be punished by a fine not exceeding one hundred dollars, and be imprisoned not exceeding thirty days, or if he shall wilfully and knowingly affirm or swear falsely, he shall be deemed guilty of perjury, and upon conviction shall be imprisoned not exceeding two years.

False certificates.

Perjury.

Special agents.

SEC. 9. The Secretary of State is hereby given discretionary power to appoint special agents for the purpose of collecting the statistics relating to mining, manufacturing and mechanical establishments. Said special agents shall each receive compensation at the rate of five dollars per day for the time actually engaged in collecting such statistics, and shall also be entitled to receive the actual expenses incurred in the performance of their duties. Said special agents shall each submit to the Secretary of State a sworn statement as to the number of days for which he is entitled to the compensation above named, together with the amount of expenses incurred, which, when approved by the Secretary of State, shall be paid by the State Treasurer on the warrant of the Auditor General.

Compensation.

Who to give account in absence of heads of families.

SEC. 10. Each and every person more than twenty years of age belonging to any family residing in any census district, and in case of the absence of the heads and other members of any such family, then any representative of such family shall be, and each of them hereby is, required, if thereto requested by the Secretary of State or enumerator, to render a true account, to the best of his or her knowledge, of every person belonging to such family in the various particulars required, and whoever shall wilfully fail or refuse to render such true account shall be deemed guilty of a misdemeanor, and upon conviction thereof, shall be punished by a fine not exceeding fifty dollars, or be imprisoned not more than thirty days.

Penalty for neglect by corporation representatives.

Every president, secretary, treasurer, director, agent or other officer of every corporation, and every establishment of productive industry, whether conducted as a corporate body, limited liability company, or by private individuals, from which answers to any of the schedules, inquiries, or statistical interrogatives provided for by this act are herein required, who shall, if thereto requested by the Secretary of State or enumerator, wilfully neglect or refuse to give true

and complete answers to any inquiries authorized by this act, or shall wilfully give false information, shall be deemed guilty of a misdemeanor and upon conviction thereof shall be punished by a fine not exceeding one hundred dollars, or by imprisonment not exceeding thirty days.

Fines.

SEC. 11. All fines collected under the provisions of this act shall be turned over, for the use of the county, to the treasurer of the county in which the offence was committed.

Blanks.

SEC. 12. The Secretary of State shall prepare the blank schedules required by this act, and shall transmit them to the several enumerators at least thirty days before the enumeration is commenced. The Secretary of State shall also prepare a pamphlet of instructions, including a copy of this act, for taking the census, and transmit one copy to each enumerator. The Secretary of State shall condense, tabulate and arrange in proper form for publication, the census and statistics of this State, taken in pursuance of this act, and when so condensed, tabulated and arranged, he shall cause the same to be printed and bound. There shall be published of said census reports a sufficient number of sets to supply one set to each of the census enumerators, one set to each of the officers, boards of officers and others entitled to the public acts of this State; also one thousand sets to be deposited in the office of the Secretary of State to supply future demands.

Instructions, etc.

Repealing clause.

SEC. 13. All acts and parts of acts contravening the provisions of this act are hereby repealed.

Approved June 7, 1901.

INSTRUCTIONS TO ENUMERATORS.

That the preparation made by the Census Division for the collection of information may be fully comprehended, we herewith present in substance "Instructions to Enumerators" which clearly outline the methods adopted.

GENERAL INSTRUCTIONS.

In accordance with the Census Act of 1901 a census of the population, of deaths, and of the manufacturing, mining, mechanical and agricultural products of the State is to be taken as of June 1, 1904.

Time Allowed for Enumeration.—The enumeration shall be commenced on the first day of June, 1904, and shall be completed on or before the first day of July, 1904. (See Section 5 of Census Act.)

Certificate of Appointment and Oath of Office.—A certificate of appointment has been sent to you, accompanied by a blank form of oath or affirmation. This oath or affirmation is to be taken and subscribed by you and immediately returned to the Census Division. Until this shall have been done, you cannot enter upon the discharge of your duties as an enumerator. After taking the oath, you cannot without justifiable cause, neglect or refuse to perform those duties. If you do, you render yourself liable, upon conviction, to a fine. (See Section 8 of Census Act.)

The Census Year.—The Census year begins with June 1, 1903, and ends May 31, 1904.

The Census Day is the day on which the census begins, namely, June 1st, 1904. Get each question on the schedules answered with reference to the Census Day (if applicable), and disregard all changes which occur in your district after that time. e. g.: If you visit a family June 4th in which a marriage took place June 2nd enter the parties as single, because they were so June 1st. Enter any person who was alive and dwelling in your district June 1st, even if he should die before you visit the dwelling.

Schedules of Inquiries.—The schedules to be used by the census enumerators are as follows:

Schedule No. 1. Relating to Population, Male.
Schedule No. 1. Relating to Population, Female.
Schedule No. 1. Relating to Population, Family.
Schedule No. 2. Relating to Agriculture.
Schedule No. 3. Relating to Live Stock not on Farms.
Schedule No. 4. Relating to Libraries and Churches.

A blank receipt showing the number of each schedule will be forwarded to you and you are requested to sign and return the same to the Census Division as soon as the number of cards has been checked.

Extra Copies of Schedules.—Extra copies of each schedule are held *in reserve in the* Census Division and you will be furnished with any

additional number of copies you may require. If the number of copies of any schedule sent to you is not sufficient, notify this Division of the kind and number required and they will be forwarded to you at once.

Enumeration Districts.—The district within which you are to take the census is stated in your certificate of appointment. Outside of your district you have no authority and will have no census duties to perform. It is your duty to personally visit every family and farm within your district; to obtain all information required with reference to them and to enter the same upon the census schedules.

Care and Return of Schedules.—Blank schedules not in use, and schedules already filled must be carefully put away where they will not be in danger of destruction or of examination by unauthorized persons and they must be kept clean and unbroken. It shall be your duty to forward the schedules to the Census Division within ten days after completing the enumeration of your district; and in the event of discrepancies or deficiencies being discovered in your returns, you shall use all diligence in correcting or supplying the same. Although the statute allows ten days in which to return the schedules after completing the enumeration, it is earnestly desired that you return the schedules as soon as you have finished the enumeration of your district. By doing this you will greatly facilitate the work in this office, and make it possible for us to forward a warrant for your compensation at an early date.

Enumerator's Rights.—Your rights as an enumerator are clearly stated in the Census Act. You have the right of admission to every dwelling (including institutions) within your district for the purpose of obtaining information required by this office. You have a right to ask every question contained in the census schedule, and to insist upon answers to each and all of them.

Refusals to Answer.—You are cautioned, however, not to obtrude needlessly upon any person visited the compulsory feature of the enumeration. In case your authority is disputed, display your certificate of appointment, which you should carry with you to be shown in case of necessity. After all other means have failed, call the attention of the person refusing to give information to the penalty in Section 10 of the Census Act. Much can be done by tact and persuasion. It is of the utmost importance that your manner should, under all circumstances, be courteous and conciliatory. In no instance should you lose your temper, or indulge in threats. Many persons will give information after a night's reflection which they are not disposed to give when first visited. If, after exhausting your powers, you fail to secure the desired information, report the facts to the Supervisor of Census who will instruct you what action to take.

Disinclination to answer is generally caused by lack of knowledge as to the purpose of the census, and the fear that in some way one's personal affairs will be made public. The information reported on any schedule will not be used as a basis of taxation, nor communicated to any assessor. It will, under all circumstances, be treated as strictly confidential. It is expected that the cases which you will be obliged to report will be few, if any, and we rely on your tact and discretion in conciliating opposition so as to finally secure answers which may at first be refused and you must not be satisfied until you are sure that

any effort you might make to secure the information would be unsuccessful. Impress upon those who raise any objection to answering the inquiries, that you are obliged by law to keep the replies entirely confidential and that no one but yourself will see them before they are sent to this office. State positively to them that the names and residences will never be made use of in any printed report. They are required simply as a means of identifying the schedule. Call their attention to that provision of the law (Section 8 of the Census Act) which makes it obligatory upon you to keep replies confidential, and which subjects you to a fine and to the revocation of your appointment in case you are derelict in your duty. You have no right to make copies of the answers to the questions for your own private use or for public or private use by any other person.

Untruthful Replies.—You have a right not only to an answer, but to a truthful answer. Do not accept any statement which you believe to be false. Where you know that the answer given is incorrect, enter upon the schedule a correct answer as nearly as you can ascertain it.

Obligation to Secrecy.—You have no right to communicate to any person any information obtained by you in the discharge of your official duties. By so doing you will render yourself liable, upon conviction, to a fine. (See Section 8 of Census Act.) You are not permitted to show your schedule, when filled, nor to retain copies of the same; and it is your duty to destroy all imperfect copies not returned to the Census Division. If, at the close of the enumeration, you are asked what is the population of your district, or any portion thereof, reply that you are forbidden by the law to answer. All such requests, whether from newspapers, local officials or individuals, are to be referred to the Supervisor of Census.

Falsification of Returns.—In canvassing your district you have not the right to omit any dwelling, establishment, or resident, nor to enter upon the schedule of population the name of any fictitious person or persons, or of any person not entitled to be enumerated as a resident of the district; nor to make any fictitious or untruthful statement concerning any individual or establishment enumerated by you. The penalty for wilful falsification of the returns is a fine not exceeding One Hundred Dollars, and imprisonment not exceeding thirty days. (See Section 8 of Census Act.)

Canvassing.—You will not be allowed to combine with the enumeration of the population and products of your district, any other occupation, such as canvassing for directory publishers, soliciting subscriptions to newspapers or magazines, or the sale or advertisement of any article whatever.

Delegation of Authority Forbidden.—You are not at liberty to delegate your authority to any other person. If circumstances arise which make it absolutely impossible for you to pursue the work of enumeration, notify the Supervisor of Census at once, stating fully the condition of affairs.

What Constitutes a Day's Work.—It is expected that you will devote ten hours, at least, every day (except Sundays) beginning with June first, to the diligent canvassing of your district. Where the obtaining of the information required will be facilitated by doing your work in

the evening, you are at liberty to do so, but in no case will payment be made for more time than is provided for by statute.

Before you are paid, comparisons will be made with the work done in previous censuses, and with the work done by other enumerators in corresponding townships, and in the case of any marked discrepancies, an explanation will be called for before the approval of your account.

All schedules sent in by you will be examined before tabulation. The more accurate your work the sooner your account will be approved and paid. In the case of correct work, a warrant for your money will be ready as soon as possible after the receipt of your work. No warrant will be issued to any enumerator until all the errors in his work shall have been corrected and all omissions of information have been supplied.

Daily Report Cards.—A sufficient number of return addressed postal cards is furnished to enable you to make a daily report to this office. At the close of each day's work, you will fill in one of these cards, stating the number of families, males, females, farms, live stock not reported on farms, libraries and churches, and the number of hours and minutes during which you were so occupied. Where practicable, these cards are to be mailed daily. If your district is sparsely settled or remote from the Post Office, mail them as soon and as often as you have an opportunity. Whether mailed or not, the cards for each day must be filled that day, and, if not mailed sooner, they must be forwarded at the close of the enumeration. Since they will be used in settlement of your account for services rendered, it is important that great pains should be taken to insure accuracy in filling them. You are entitled to credit not only for the time consumed in the ordinary work of enumeration but also for that occupied in hunting up delinquents and absentees, in securing information not obtained at the first visit.

Unused postal cards should be placed in the box containing your schedules and returned to this office. A consolidated time report showing the number of hours and minutes employed each day, as required on the daily report card previously sent in, is also to be filled, acknowledged and forwarded to this office as soon as the enumeration of your district is completed.

Diligence in Enumeration Necessary.—You are cautioned not to lose time in your canvass. Do not loiter by the way. On entering the house, state your business in a few words, ask the necessary questions, make the proper entries, and, as soon as your business as an enumerator shall have been transacted, leave the premises.

Responsibility of Enumerators to Supervisor.—All your duties are to be performed under the direction and control of the Supervisor of Census, to whom you are immediately responsible.

Use of Telegraph or Telephone.—In communicating with the Supervisor of Census for all ordinary purposes the mail will be sufficient; but should any emergency arise, during the progress of the enumeration, in which you need immediate counsel and instruction, you may communicate with the supervisor by telegraph, collect, or telephone, charges reversed.

Use of Interpreters.—The use of interpreters should be avoided as far as possible, and no expense should be incurred for the employment of an interpreter in your enumeration district except in those cases where it is absolutely essential to the *proper* completion of your work. No

such expense must be incurred, however, unless it has been previously authorized by the Supervisor of Census.

Where difficulty is encountered in making the head of the family understand what is wanted, you should call upon some other member of the family who is able to speak English, if there be one, to assist you in the enumeration. If no member of the family can aid you in your work, then the assistance of some neighbor of the same nationality and able to speak English, should be obtained, whenever possible.

Where the employment of a paid interpreter is found to be absolutely necessary, you should report to the Supervisor of Census the fact, and the character and extent of the services desired. He will then provide for the employment of some suitable person to act in this capacity, if he is satisfied that the services of an interpreter are necessary.

In most cases, you should know beforehand where the services of an interpreter are likely to be needed in your district, if at all, and arrange accordingly with the Supervisor of Census for this part of your work.

If the services of an interpreter are needed in a considerable portion of your district, representing a number of families, you should provide for the enumeration of this part of your district on the same day, or on consecutive days, and should avoid keeping the interpreter employed when not actually needed.

In case of special difficulty you will make a full report (beforehand, if possible) of the facts to the Supervisor who will adopt such measures in the particular circumstances, as may be necessary to obtain a full and accurate enumeration.

In the case of a single family or individual, you should use every effort to ascertain the facts required without the use of an interpreter, but failing in that, you should notify the Supervisor of Census immediately and await his action in the matter, so far as the enumeration of that particular family or individual is concerned.

The interpreter before entering upon his duties must take and subscribe to an oath which will be furnished by the Supervisor of Census.

Separation of Village from Township.—In case the district assigned to you for enumeration embraces all or any part of any incorporated city or village, and also other territory not included within the limits of such incorporated city or village, or either, it is your duty to clearly and plainly distinguish and separate on all schedules, the inhabitants of all or any part of such city or village, as may be embraced in the district assigned to you, from the inhabitants of the territory not included therein. In returning the cards to the Census Division, tie up the packages separately, placing a distinguishing mark upon each.

If two or more townships (or parts of townships) are included in your district, each of them must be separately enumerated by you, taking pains to mark the schedules so as to distinguish them from each other beyond the possibility of an error. Complete the enumeration of one township or part of a township and tie up the schedules for that township, or part of township, before beginning to enumerate another township (or part thereof).

If your enumeration includes one or more wards of a city, or parts of wards, use the same care in separating the cards.

Schedules should under no circumstances be intermingled. All sched-

ules No. 1 used in the enumeration should be tied up separately, schedule No. 2 separately, etc. All unused schedules should be tied up in a separate package before returning them to this office.

Pencils.—We wish you to use the pencils sent herewith in filling all schedules. No other kind of pencil should be used. The writing must be legible, the marks made firmly; illegible or faintly written returns will, necessarily, be subjected to revision and your account will not be approved until the schedules are in perfect condition for tabulation.

Return of Cards and Material.—Printed addressed labels are sent you which are to be used in returning the census cards and material by express. When your work is completed, all schedules not used and all other unusued material should be neatly packed in the box in which they were forwarded to you and returned to the Census Division. All materials sent, whether used or unused, should be carefully handled and returned in the best possible condition. Be sure to fill out the form in the lower left hand corner of the label showing the county, township, city or village enumerated by you.

It is believed that in cities considerable difficulty will arise in securing complete information from lodgers in boarding houses who are absent during the day, and concerning whom the proprietor of the house is unable to supply the desired information and oftentimes unwilling to make the necessary inquiries. To obviate this difficulty, the enumerator is required to leave a card suitable for the enumeration enclosed in an envelope which will be furnished him. The mode of procedure is for the enumerator to leave a card in an unsealed envelope with the proprietor of the lodging house; after filling the same the lodger can seal the envelope and leave it with the proprietor of the lodging house to be delivered to the enumerator when he calls for it.

Rubber Bands.—A sufficient number of rubber bands will be furnished to enable you to keep the cards used in the enumeration of each family separate, and we shall consider that neglect to conform to this instruction is inexcusable and the enumerator will be required to put the cards in the proper order at his own expense.

SPECIFIC INSTRUCTIONS.

Schedule No. 1.

Population and Social Statistics.

The schedule used for the enumeration of the population of this State is made up of three separate cards, namely: Family, Male and Female. To avoid confusion, three colors are used for the cards making up this schedule. One of the schedules, printed on a canary card, is used for families only. The second schedule, printed on a blue card, is used for male persons only, either children or adults. The third schedule, printed on a rose card, is used for female persons only, either children or adults. These cards must not be interchanged: i. e., information obtained concerning male persons must not be entered upon the schedule for females, and information concerning female persons must not be entered upon the schedule for males.

The schedules used for the enumeration of each family must be kept by themselves by the use of rubber bands. The first work of examina-

tion done in the census office will be to take each family schedule in order, note the number of males and females given in answer to inquiries 11 and 12 on the family card, and then ascertain if the proper number of schedules for males and schedules for females has been filled out and follow just behind the family schedule to which they belong. In arranging the cards, put the schedules for males together first behind the canary color or family card, and then the schedules for females. If the cards, when returned by the enumerator, are not in the order called for by this instruction, we shall consider that the neglect to conform to this instruction is inexcusable and the enumerator will be required to put the cards in the proper order at his own expense.

In the succeeding pages we shall take the inquiries, one by one, explaining the proper manner for writing the answer to each inquiry.

In all cases where an inquiry can be answered directly, write in the reply in the proper space. Sometimes the printed inquiry is not applicable to the person to whom it is made and no answer can be obtained. In such cases use the following symbol (X).

When, for any reason, it is impossible to obtain answers to inquiries which are nevertheless applicable, fill in the space with the following symbol: (=). The use of these symbols will enable the enumerator to fill every space in the schedule with a written reply or a distinctive mark. We shall insist upon the use of these signs and if omitted by the enumerator he will be required to supply them before his account will be approved. These symbols should be used on all schedules where needed.

THE FAMILY SCHEDULE.

(1) Family Number.	FAMILY	(2) Sex.
(3) Surname.	(4) Christian Name and Initial.	
(5) County of—	(6) Township of—	
(7) City or Village of—		(8) Ward.
(9) Street and Number.		(10) Precinct.

NUMBER OF PERSONS IN THIS FAMILY.

(11) No. MALES.	(12) No. FEMALES.	(13) TOTAL No.

(1) Family Number.

Inquiry 1.—The object of this question is to get the number of families in your district. Enter the first family you visit as 1, the second 2, and so on until your work is completed. The last number you write in this space will be the entire number of families in your district.

The word *"family,"* for census purposes has a much wider application than it has in ordinary speech, and means a group of individuals who occupy jointly a dwelling place or part of a dwelling place. A person who boards in one place and lodges in another should be returned as a member of the family where he lodges. A domestic servant, unless she sleeps elsewhere, is to be returned as a member of the family in which she works.

All the occupants and employees of a hotel, if they regularly sleep there, make up, for census purposes, a single family, because they occupy one dwelling place. The same is true of all officials and inmates of an institution who live in the institution building and all students in a dormitory. But where officers or employees of an institution sleep in detached houses or separate dwelling places, they are separate families.

As the census family may thus be much larger than a natural family, so it may also be much smaller, for one person dwelling alone is to be returned as a family. A clerk in a store, who regularly sleeps there, is to be reported as a family. Be careful to watch and ask concerning such persons living alone, otherwise they are likely to be omitted and the population reported from your district will be in consequence too small.

(2) Sex.

Sex.—By this is meant the sex of the head of the family. It will be seen that by tabulating this inquiry we shall learn in how many families the head of the family is male, and in how many families the head of the family is female.

(3) Surname.	(4) Christian Name and Initial.

Inquiries 3 and 4 call for the surname, Christian name and initial of the head of the family whose sex is indicated by the answer in Inquiry 2.

(5) County of—	(6) Township of—
(7) City or Village of—	(8) Ward.
(9) Street and Number.	(10) Precinct.

Inquiries 5, 6, 7, 8, 9 and 10 refer only to the location of the individual enumerated. Be sure that you thoroughly understand the ward and precinct boundaries so that the proper figures may be inserted in answers to eight and nine. Information concerning the location should be *carefully* filled out on every card.

(11) No. Males.	(12) No. Females.	(13) Total No.

Inquiry 11 calls for the number of males in the family. Inquiry 12 calls for the number of females. Inquiry 13 calls for the number of persons, or the total of the figures given in answer to inquiries 11 and 12.

MALE AND FEMALE SCHEDULES.

(1) Family Number.	MALE	(2) Relation to Head of Family.
(3) Surname.	(4) Christian Name and Initial.	
(5) County of—	(6) Township of—	
(7) City or Village of—		(8) Ward.

(15) Native Born Voter.	(16) Naturalized Voter.	(13) Age.
(17) Native Born or Foreign Born.	(18) Alien.	(14) Conjugal Condition.

(19) Read.	(20) Write.	(21) Speak English.
(22) School Attendance.	(23) Place of Birth.	
(26) Place of Birth of FATHER.		(24) No. Years Resident in Michigan.
(27) Place of Birth of MOTHER.		(25) No. Years Resident in United States.

(1) Family No.	FEMALE	(2) Relation to Head of Family.
(3) Surname.		(4) Christian Name and Initial.
(5) County of—		(6) Township of—
(7) City or Village of—		(8) Ward.
(9) Street and Number.		(10) Precinct.
(11) Physical Condition.		(12) Color and Race.
(13) Age.	(14) Conjugal Condition.	(15) Native Born or Foreign Born.

(16) Read.	(17) Write.	(18) Speak English.
(19) School Attendance.	(20) Place of Birth.	
(23) Place of Birth of FATHER.		(21) No. Years Resident in Michigan.
(24) Place of Birth of MOTHER.		(22) No. Years Resident in United States.

MALE AND FEMALE SCHEDULES.

Preceding will be found facsimile copies of the schedules for males and the schedules for females, the upper portion being the front side of the card in each case and the lower portion upon each page being the back or reverse side of each card.

For the purpose of explaining the meaning of some questions which may not be perfectly clear, the different schedules are cut into blocks or sections, which will be considered separately. The numbering on the male and female schedules is the same up to and including No. 14. The variation in numbers between these two schedules is due to the fact that the inquiries relating to political conditions are omitted upon the schedule for females. In other words, there are twenty-nine inquiries upon the schedule for males, while upon the schedule for females there are twenty-six only. The inquiries will be treated as of one schedule up to and including No. 14, after which reference will be made by the use of letters and figures in parenthesis to corresponding questions on the schedule, e. g. (M. 17, F. 15). This means that the inquiry regarding the birth of an individual, whether native or foreign, is numbered 17 upon the schedule for males, and 15 upon the schedule for females.

(1) Family Number.

In the space headed *"Family Number"* is to be entered the number, in the order of visitation, of each family residing in your district. What constitutes a family for the purpose of this Census has been explained in a preceding paragraph. This will be of use to you in making up your daily time report and showing the number of family schedules completed by you. e. g., If, at the close of the first day's work, the number reported in this space is 112, enter that number under the proper head in your report. The number of family schedules completed the second day may be ascertained by subtracting from the total number of families enumerated, the number given at the close of the first day's work.

(2) Relation to Head of Family.

In case of the head of a family, whether a husband, a father, a widow, or an unmarried person of either sex, you should write the words *"head of family"*; for other members of the family write *wife, mother, father, son, daughter, grandson, aunt, uncle, nephew, niece, boarder, lodger, servant, etc.*, according to the particular relationship which the person bears to the head of the family. Occupants of an institution or school, living under a common roof, should be designated as *officer, in-*

mate, pupil, patient, prisoner, etc., and in case of the chief officer, his title should be used as *warden, principal, superintendent, etc.* Institutions whose inmates occupy different buildings should be enumerated as though they occupied one institution building. If more than one family resides in the institution building or buildings, enumerate each family separately and keep the schedules separate by the use of rubber bands. If two or more persons share a common abode as partners, write *"head"* for one and *"partner"* for the other or others.

(3) Surname.	(4) Christian Name and Initial.

Enter the name of every person whose usual place of abode is in the family or dwelling place for which the enumeration is being made.

The Census Day, i. e., the day as of which the enumeration is made, is June 1, 1904. Include, therefore, every person living on June 1, 1904, or during any part of that day, and omit children born after that day.

It is intended that the name of every man, woman and child whose usual place of abode on the first day of June, 1904, is within your district shall be entered on the population schedule, but no entry is to be made of a child born between the first day of June, 1904, and the day of your visit, say June 5th, 15th, etc., as the case may be.

On the other hand, every person who was a resident of your district upon the first day of June, 1904, but between that date and the day of your visit shall have died, should be entered on the schedule precisely as if still living. The object of the schedule is to obtain a list of the inhabitants on the first day of June, 1904, and all changes after that date, whether in the nature of gain or loss, are to be disregarded.

The Census Law furnishes no definition of the phrase *"usual place of abode";* and it is difficult to guard against the danger that some persons will be reported in two places and others not reported at all. Much must be left to the judgment of the enumerator, who, if he will take the pains, can satisfy himself, in the great majority of instances, as to the propriety of including or not including doubtful cases in his enumeration of any given family. In the case of boarders at hotels, students at school or colleges, and inmates of institutions, ascertain whether the person concerning whom the question may arise, has at the time any other place of abode within another district at which he is likely to be reported. Seafaring men are to be reported at their land homes, no matter how long they may have been absent, if they are supposed to be still alive. Hence, sailors temporarily at a sailors' boarding or lodging house, if they acknowledge any other home within the United States, are not to be included in the family of the lodging or boarding house.

Railroad men, if they habitually return to their homes in the intervals of their occupation, will be reported as of their families, not where they may be temporarily staying on June 1, 1904.

Transient guests of a hotel are not to be enumerated as of the hotel unless they are likely otherwise to be omitted from the enumeration; *but* the proprietor and his family, and those boarders, employees and

servants who regularly sleep there are to be so included. All inmates of transient lodging houses are to be so enumerated if they claim no other home, or have no other place of abode.

Summer boarders at hotels or country houses and persons temporarily residing in foreign lands should be enumerated as a member of their family at their home or usual place of abode. The floating population in vessels, steamboats and house-boats at wharfs, piers and river landings should be enumerated on the morning of June 1st as far as possible, by the enumerator of the district contiguous to the water front, including in the enumeration all persons who claim to be residents of the State, even though they had no other home than on board the craft where they are found. It is important to ascertain beyond a doubt whether the information given by the person supplying the same covers all the persons in the family, including not only the immediate members of the family, as the head, wife, and children, but also other relatives living with the family, servants (if they sleep in the house), and persons who live with the family, as boarders, lodgers, etc. In the case of boarders, lodgers, or other persons living in the family, for whom no information can be obtained at the first visit, leave a schedule, male or female, as the case may be, to be filled out and called for later.

(5) County of—	(6) Township of—
(7) City or Village of—	(8) Ward.
(9) Street and Number.	(10) Precinct.

Be sure that you thoroughly understand the Ward and Precinct boundaries so that the proper figures may be inserted in answers to questions 8 and 9. Information concerning the location of every person enumerated should be carefully filled out on every schedule.

(11) Physical Condition.

By *physical condition* is meant whether *insane, epileptic, idiotic, deaf and dumb, or blind.* If none of these conditions exist, this question is inapplicable and should be so indicated by the use of the symbol given heretofore, (X).

(12) Color and Race.

Write "W" for *white;* "C" for *black* (negro or negro descent); "Ch" for *Chinese;* "Jp" for *Japanese;* and "In" for *Indian,* as the case may be.

(13) Age.

By this question is meant the age of the individual at his last birthday. The ages of children not one year should be expressed fractionally in twelfths of years: e. g., three months, 3-12; ten months, 10-12. The ages of children not one month should be expressed as follows: 0-12. Endeavor to obtain exact ages, and avoid the usual concentration of 25, 30, 35, 40, etc. If the answer is *"about forty"* find out, if possible, whether the age is 39, 40 or 41.

(14) Conjugal Condition.

By this is meant whether the individual is single, married, widowed or divorced. Write "S" for *single* or *unmarried* persons; "M" for *married;* "Wd" for *widowed* (man or woman), and "D" for *divorced.*

POLITICAL CONDITION.

(15) Native Born Voter.	(16) Naturalized Voter.	(18) Alien.

These three inquiries are found upon schedules for males only. If the individual whom you are enumerating is not a voter because he has not attained the age of twenty-one, as required by the provisions of statute for qualified electors, use the symbol (X) in spaces 15, 16 and 18, which signifies that the questions are inapplicable. If, however, the individual is a qualified voter under the laws of this State, native born, write the word *"Yes"* in No. 15, and use the symbol (X) in Nos. 16 and 18 to show that the questions are inapplicable. If the individual is a qualified elector under the laws of this State, but is of foreign birth, that is, is of foreign birth, twenty-one years of age or over, and has complied with the naturalization laws of the United States (either by his own act or that of his father), write the word *"Yes"* in space No. 16. In all other cases use the symbol.

Persons of foreign birth twenty-one years of age or over, who have declared their intentions to become citizens of the United States, should be enumerated as naturalized voters.

Aliens.—In the case of all male persons, of foreign birth, twenty-one years of age or over, *who have not complied* with the naturalization laws

of the United States, write the word *"Yes"* in space 18. In all other cases use the symbol.

(17) Native Born or Foreign Born. (M 17, F 15.)

If a person was born in any part of the United States, insert the capital letters *"N. B.,"* if not born in the United States, insert the capital letters *"F. B."* The inquiry relating to place of birth (M. 23, F. 20,) supplies the information required to determine whether the person is native born, or foreign born, so that this question need not be asked separately, but the letters *N. B.* or *F. B.* can be filled in after inquiry has been made as to place of birth. The object of this classification or repetition is so that the questions pertaining to Political Condition may be grouped for convenience in tabulation.

LITERACY.

(19) Read. (M 19, F 16.)	(20) Write. (M 20, F 17.)
(21) Speak English. (M 21, F 18.)	(22) School Attendance. (M 22, F 19.)

Write *"Yes"* for all persons ten years of age and over who can read any language, and *"No"* for all other persons of that age who cannot read any language. Write *"Yes"* for all persons ten years of age and over who can write any language, and *"No"* for all other persons of that age who cannot write any language.

The inquiries in spaces (M 19, F 16, M 20, F 17) and (M 21, F 18), are intended to show the literacy of all persons ten years of age and over and should be answered according as they are able to read or write the language ordinarily spoken by them. If the person is not of the age of ten years, use the symbol (X) to indicate that the questions are inapplicable. Write *"Yes"* for all persons ten years of age and over who can speak English and *"No"* for all other persons of that age who cannot speak English.

For all persons attending school during the year ending June 1, 1904, enter the number of months (or parts of months) of school attendance, as 9, 8½, etc. If a person of school age did not attend school at all during the year, write *"O."* In case this question is inapplicable use the symbol.

(23) Place of Birth.

The object of this question is to get the birth place of every person living in your district. If the person was born in the United States, enter in the space the State or Territory (not city or town) of the United States in which he was born. A person born in what is now West Virginia, North Dakota, South Dakota or Oklahoma should be reported as so born, although at the time of his birth that particular region may have had a different name. If a person was born outside of the United States, enter the name of the country (not county or district) in which he was born. By country is meant usually a region whose people have direct relation with other countries, thus, do not write Prussia, or Saxony, but Germany. To this rule, however, note the following exceptions: Write Ireland, England, Scotland or Wales rather than Great Britain. Write Hungary or Bohemia rather than Austria for persons born in Hungary or Bohemia respectively. Write Finland rather than Russia for the persons born in Finland. Note, also, that the language spoken is not always a safe guide to the birth place. This is especially true of Germans, for over one-third of the Austrians and nearly three-fourths of the Swiss speak German. In case a person speaks German therefore, inquire carefully whether the birth place was Germany, Austria or Switzerland. In case a person speaks Polish, as Poland is not now a country, inquire whether the birth place was what is now known as German Poland, Austrian Poland or Russian Poland, and enter the answer accordingly as Polish (Ger.), Polish (Aust.), Polish (Russ.). If the birth place reported is Canada or New Foundland, ask whether the person is of English or French descent. Write Canada (Eng.), or Canada (Fr.), according to the answer. If the person was born abroad of American parents, write in both the birth place and "Am. Cit."; that is, American citizen. If a person was born at sea, write "*At sea.*"

(24) No. Years Resident in Michigan.	(25) No. Years Resident in United States.
(M 24, F 21.)	(M 25, F 22.)

These inquiries refer to the number of years resident in Michigan and in the United States of the individual whom you are enumerating, and great care should be taken that they do not become confused with questions (M 26, F. 23), and (M 27, F 24).

(26) Place of Birth of Father.	(27) Place of Birth of Mother.
(M 26, F 23.)	(M 27, F 24.)

AGRICULTURAL SCHEDULE.

This schedule is made up of five cards, four of which are printed on both sides, and the other on one side only. Four of these cards are printed on one sheet and sent to you uncut. They should be returned to this office in the same condition. After you have completed the enumeration of a farm, attach the fifth or separate card to the sheet by the use of a clip, a number of which will be furnished you for that purpose.

Special attention is called to instructions given relative to the separation of schedules where two or more townships, or parts of townships, are included in your district.

Purpose of Census.—The agricultural census is taken for the purpose of obtaining accurate statistics concerning the property devoted to agriculture, June 1, 1904, and similar information concerning agricultural operations during the Census Year, and the number of domestic animals in cities and towns, June 1, 1904. For the purpose of gathering statistics relative to live stock not reported on farms, a special schedule (No. 3) has been prepared.

Special Inquiries Concerning Farm Land.—In farming communities, villages and small cities, you should inquire of every family whether any member cultivates or directs the cultivation of a farm, or makes use of farm land in that or any other enumeration district.

Farms Located in Two or More Enumeration Districts.—In some sections of the country, farms may be found with lands lying in two or more enumeration districts. When the occupant or manager of such a farm resides upon the same or any part of it, the whole farm should be reported in the enumeration district in which the occupant or manager has his habitation. You should include upon the regular farm schedule, a report of all the lands connected with such farm wherever they may be located, together with an exhibit of all its live stock, products, etc. The enumerator of a district which contains a portion of the land belonging to such farm, but not including the habitation of its occupant or manager, is not to make any report of such land, or of the live stock or products of the same.

What Constitutes a Farm.—A farm for census purposes includes all the land, under one management, used for raising crops and pasturing live stock, with the woodlands, swamps, meadows, etc., connected therewith, whether consisting of one tract or of several separate tracts. It also includes the house in which the farmer resides and all other buildings used by him in connection with his farming operations, together with the land upon which they are located. If an individual conducting a farm resides in a house not located upon the land used by him for farming purposes and his chief occupation is farming, the house and lot on which it is located are a part of the farm. If, however, he devotes the greater portion of his time to some other occupation, the house in which he resides is not a part of the farm.

If the land owned by an individual, firm or corporation is operated in part by the owner and in part by one or more tenants or managers, or if the land is wholly operated by tenants or managers, the portion of the land occupied by each is a farm, and must be reported in the name of the individual or individuals operating it. No land cultivated

under the direction of others is to be included in the report of the land operated by the owner.

For census purposes, market, truck and fruit gardens, orchards, nurseries, cranberry marshes, greenhouses, etc., are *"farms,"* provided the entire time of at least one individual is devoted to their care. This statement, however, does not refer to gardens in cities or towns, which are maintained by persons for the use or enjoyment of their families and not for gain.

Public institutions, as alms houses, insane asylums, etc., cultivating large vegetable gardens or fruit gardens, or carrying on other agricultural work, are to be considered *"farms."*

Change of Owners or Tenants.—If a farm has changed owners, tenants or managers, shortly before you take the enumeration, report it fully in the name of the person in possession, securing from him the facts concerning the live stock and implements, acreage and value of the farm, June 1, 1904, and from the best sources accessible, the facts concerning the products of the crops during the Census Year.

Change in Size of Farm.—If a tract of land which in 1903 was divided and cultivated by two or more persons, is cultivated by one person June 1, 1904, report it as one farm only. Or vice versa, if that which in 1903 was one farm, is operated June 1, 1904, as two or more distinct farms, report as many farms as there are separate owners, managers or tenants.

Inquiries for Every Farm.—In the body of the schedule you will find inquiries or groups of inquiries, numbered 1 to 36 inclusive. Some farms will require answers to a few inquiries and others to many, according to the variety of the agricultural operations and live stock.

Make a full report of the agricultural operations of each farm for the crops produced during the Census Year.

Incorrect Statements.—You are not expected to accept answers which you have reason to believe are incorrect. Many farmers do not keep book accounts; they cannot tell exactly the quantity or value of their products, and it often happens that, with the best intentions, they make incorrect replies. To detect all such errors, and to assist the farmer in making correct answers to inquiries, you should make yourself familiar with the yield per acre, price at which farm products were sold, the average quantity of milk, butter and cheese produced per cow, and the average number of eggs per fowl, obtained during the Census Year in your district.

Distinction Between Farm and Factory Products.—Many products, such as butter, cheese, cider, wine, sugar, molasses and dried fruits are sometimes made on a farm and sometimes elsewhere. If made on a farm, they are to be reported on the farm schedule, otherwise not.

Units of Measure.—If units of measure other than those indicated, are employed in your district, insert the local measure before filling the schedule. In the case of products sold by number, buckets, baskets or other indefinite measures, secure estimates of the quantities reported in the units indicated on the schedule, if possible.

Acres.—Wherever the number of acres is required, the nearest whole number should be given for tracts of three acres or more. For small tracts the areas may be given in acres, and fractional parts.

Values.—The values reported on this schedule should be those of local *markets. The value reported* for farm implements, and live stock should

be the amounts for which they could be sold June 1, 1904, under average conditions. The values of farm products should be the amounts for which they were sold, or for which they could have been sold on the farm or at the usual market town, when harvested or made ready for use or sale. This should include the value of the complete product of all fruits and vegetables which were dried, canned or otherwise preserved on the farm, or which were made on the farm into cider, vinegar, wine, pickles, etc. Give values in dollars only. For stalks, straw, seeds or other by-products of any crop for a market value, include it with that of the total value of the crops.

Mixed Crops.—When oats and rye, or oats and peas, or any other two or more grains are sown together and harvested after ripening, report the acreage, products, and value of each in proportion to the quantities of seed sown.

1904—CENSUS OF MICHIGAN—1904

Cream			Gals		
Butter	Lbs		Lbs		
Cheese	Lbs		Lbs		

(32) Total value of all MILK, CREAM, BUTTER and CHEESE produced during year and consumed on the farm.....$.....

(33) SILOS.	Number of—	Capacity in tons.

(34) WOOL, MOHAIR AND GOAT HAIR.
Shorn in fall of 1903 and spring of 1904.

Wool, etc.	Number of fleeces.	Total weight of fleeces (unwashed).		Total value.
				$
Wool		Lbs		
Mohair		Lbs		
Goat hair		Lbs		

(35) POULTRY AND EGGS: Number of fowls on farm June 1, 1904.

Chickens.	Turkeys.	Geese.	Ducks.

Value of all kinds of poultry on hand June 1, 1904.....$.....

Value of all poultry raised during census year, whether sold, consumed or on hand June 1, 1904.....$.....

Dozens of eggs produced during census year.....

Total value of all eggs produced during census year.....$.....

(36) BEES AND HONEY:

Number of swarms or hives of bees on hand June 1, 1904.....

Total value of bees on hand June 1, 1904.....$.....

Number of pounds of honey produced during census year.....

Number of pounds of wax produced during census year.....

Total value of honey and wax produced during census year.....$.....

SPECIAL INSTRUCTIONS.

Inquiries 1, 2, 3, 4.—The same care should be exercised in filling in inquiries relative to the name of the person conducting the farm and the location, as is used on the population schedule.

Inquiry 5.—Color and Race.—See instructions under corresponding question on population schedule.

Inquiry 6.—Tenure.—This inquiry is to be answered according to the following instructions:

Owner.—If a farm is cultivated by an individual who owns all or part of it, by a man whose wife owns all or part of it, by a widow, widower, heir or heirs, holding the property as successors to a deceased owner, or by the trustee or guardian of such heirs, write "Owner."

Owner and Tenant.—If a farm is cultivated jointly by its owner and by one or more other persons working for a share of the farm products, write *"Owner"* after the name of the owner, and *"Share"* after that of the tenant on shares.

Management.—If a farm is cultivated for its owner, or a public institution, by a salaried manager, superintendent, overseer, etc., write *"Manager."*

Cash Tenant.—If a farm is cultivated by a tenant who pays a fixed

rental in money, or a stated amount of labor or farm commodities (not a proportionate share of all), write *"Cash."*

Tenant on Shares.—If a farm is cultivated by a tenant who pays for its use a share (as ⅓, ½, or other proportion) of the crops raised, write *"Share."* The word *"Tenant"* alone is in no case to be used in filling in the space. Write *"Cash Tenant"* or *"Tenant on Shares"* instead.

Inquiry 7.—Total Number of Acres in Farm.—The total number of acres reported in space 9, should include all land used in connection with the farm, for pastures, meadows, woodlands and other agricultural purposes, but no land which is cultivated by another person. The number reported in this space should equal the totals of 7 and 8, also 10 and 11.

For Tenure see instructions under Inquiry 6.

Inquiries 12, 13 and 14.—Reports to inquiries 12, 13 and 14 should be based upon the value of the farm buildings and implements on June 1, 1904.

Inquiries 15 and 16.—Great care should be exercised in securing information relative to wages paid on the farm. It is believed that the amount of wages paid for farm labor compares favorably with the amount paid for other kinds of labor and a complete report should be obtained from every farmer in your district.

In giving the total amount of wages paid during the year (Inquiry 16) include board. In inquiry 15 if no outdoor or indoor day labor has been employed on the farm during the Census Year, indicate by use of the symbol (X). This rule should apply in filling out all the spaces in inquiry 15.

Inquiry 17.—Grains and Seeds.—Include with the value of grains and corn reported, any amounts received from the sales of straw and cornstalks.

Grains Including Corn.—To be reported in this group are those harvested after ripening. The quantities called for, for all grains excepting corn, are those of threshed grain. Where any threshed grain has been fed to stock, include its acreage with that of the threshed grains of the same kind, and also careful estimates of the quantity raised and its value. The quantities of grain reported may be for shelled corn or for corn on the ear, as is most convenient, but not for both shelled corn and corn on the ear.

Inquiry 18.—Hay and Forage.

Hay.—When fields of clover, alfalfa, millet and other grasses were mown in 1903, two or more times, report the acreage of such fields only once, but give, under quantities produced and values, the total number of tons of hay and forage cut in the year and the total value of the same.

Grains Cut Green, and used for hay or forage for cattle should not be reported under grains and seeds (Inquiry 17), but under their appropriate designations with other hay crops.

Inquiry 19.—Miscellaneous Crops.—By other crops under the first division of this inquiry, is meant other crops of a similar nature. In the blank spaces at the end of each division of this inquiry, report the acreage and value of any important crop raised on the farm which is not mentioned by name or otherwise specially referred to on the schedule.

Inquiry 20.—Vegetables.—Report under "other vegetables" all vege-

tables not specifically mentioned in this inquiry giving acreage and value of product. In no instance should the blank lines at the end of any inquiry be filled.

Inquiries 21 and 22.—Farm Animals.—Under these inquiries should be reported all animals on the farm June 1, 1904, whether belonging to the occupants of the farm or to others.

Inquiry 23.—Live Animals Sold.—When cattle and sheep have been purchased and kept on the farm for the purpose of fattening them for beef and mutton, and then sold, the answer to be given to this inquiry is to be obtained in the following manner: To the amount received by the proprietor of a farm from the sale, during the Census Year, of live animals raised on the farm, should be added the amount received from the sale of animals purchased and fattened, deducting from the sum the amount paid for the purchased animals before fattening.

Of Inquiries 24 to 36 inclusive nothing need be said other than to impress upon you the importance of complete and accurate returns upon this schedule. It is expected that some difficulty will be experienced in gathering these statistics, since some farmers keep no record of quantities and value of products raised, amount received for sale of live stock, etc.

Where a complete record has not been kept by the farmer, you should exercise the utmost care in making estimates which are to be based upon information obtained from the farmer, or upon your own knowledge of farming conditions in that district. In no case omit a farm simply because you are unable to secure from the occupant all the information asked for on the schedule. It may be that the occupant has resided upon the farm but a short time, and the former occupant has removed from the district. If this is true, ascertain the facts as nearly as may be and make your estimates conservatively.

It is believed that the aggregate on quantity and value of products under former censuses has been considerably lower than the facts warrant, and it is our purpose to obtain, if possible, a more complete statement in this census of the quantity and value of farm products. To secure such a statement the farmers and enumerators are directed to state the quantity and value of *everything raised on the farm,* that of the poultry raised, and that of the various products not otherwise reported.

There is a list on file in this office showing the number of farms in every township in the State and the number reported by you will be compared with the number on this list, and in case the number reported by you is insufficient you will be required to supply the omissions before a warrant on the County Treasurer is issued for your compensation as an enumerator.

LIVE STOCK NOT REPORTED ON FARMS.

On this schedule are to be reported all live stock, neat cattle, horses, mules, sheep, swine and goats. They are to be reported by the barn or inclosure in which they are kept on June 1, 1904, and in the name of the proprietor of the barn or inclosure on such date. Proprietors of boarding or livery and sales stables, and other occupants of barns and inclosures for keeping live stock, should report the number of all ani-

mals in their care on that date, as well as of those owned by themselves. No report is to be made for barns or inclosures in which no live stock is kept on June 1, 1904. Do not report upon this schedule animals that belong to any farm, however small. They should be reported on the general agricultural schedule. Care and vigilance should everywhere be exercised in securing reports for all stables, barns and inclosures in which domestic animals are kept, and no animal reported as owned or kept on a farm should be reported on this schedule and only one report of each animal should be made.

1904—CENSUS OF MICHIGAN—1904

SCHEDULE NO. 3—Live Stock, Etc., Not on Farms.

(1) County of—	(2) Township of—
(3) City or Village of—	(4) Name of proprietor of barn or inclosure.

(5) PURE-BLOODED ANIMALS:

Number and breed of all pure-blooded animals within inclosure June 1, 1904, recorded or eligible to record. This number should also be reported under (7).

Goats	All ages		

LIBRARIES AND CHURCHES.

A special schedule has been prepared for the purpose of gathering statistics relative to the libraries and churches of this State. Information relating to these schedules should, in all cases, be obtained from librarians, church clerks or other proper officials.

It is believed that the inquiries relative to libraries and churches are so clear in themselves that no explanation is needed. It is important that the information gathered on this schedule should be complete and accurate in every detail, and you are directed to use every effort in securing this information.

1904—CENSUS OF MICHIGAN—1904

SPECIAL SCHEDULE NO. 4—Libraries and Churches.

LIBRARIES.

(1) County of—	(2) Township of—
(3) City or Village of—	(4) Date of founding.
(5) Kind of—(a)	(6) How supported.

(11) Value of church property not including parsonage. $.....	(12) Salary of officiating clergy. $.....
(13) Has organization a Sunday School?	(14) No. members in Sunday School.
(15) Total amount raised during year for church purposes. $.....	(16) Total amount raised during year for Sunday School purposes. $.....

N. B. In case Sunday School exists independently of church organization fill in numbers (8), (14) and (16) if applicable.

STATISTICS OF POPULATION.

POPULATION.

The first census of Michigan, which was taken in 1800 as a part of the National Census of that year, reports only 551 inhabitants for the entire State. This report is misleading, however, inasmuch as Michigan, being at that time unorganized territory, had no definite boundary. The lower peninsula formed a part of the county of Wayne, which included also parts of Ohio and Indiana, and, although there were at least 2,000 inhabitants in this portion of the State, all were reported from Ohio. The only inhabitants allotted to Michigan in this report were the 551 living in the county of Mackinac, which was then an ill-defined portion of the upper peninsula.

The population of the State, according to the official count taken June 1, 1904, is 2,530,016, which, compared with the population of equivalent areas enumerated by the Federal census in 1900, shows an increase of 109,034, or 4.5 per cent.

The percentage of increase from 1880 to 1884-1890 to 1894 and from 1900 to 1904, respectively, would be as follows:

TABLE I.

Census years.	Population.	Increase.	
		Number.	Per cent.
1904	2,530,016		
1900	2,420,982	109,034	4.5
1894	2,241,641		
1890	2,093,889	147,752	7.0
1884	1,853,658		
1880	1,636,937	216,721	13.2

The gradual diminution in the rate of increase, as shown by the figures in Table I, is doubtless due to the gradual decrease of immigration as the State becomes more settled.

TABLE II.—*Increase of population of the State at each census, 1800 to 1904.*

Census years.	Population.	Increase.	
		Number.	Per cent.
1904	2,530,016	109,034	4.5
1900	2,420,982	179,341	8.0
1894	2,241,641	147,752	7.0
1890	2,093,889	240,231	13.0
1884	1,853,658	216,721	13.0
1880	1,636,937	302,906	23.0
1874	1,334 031	149,749	13.0
1870	1,184,282	380,621	47.0
1864	803 661	54,548	7.0
1860	749,113	241,592	48.0
1854	507,521	109,867	28.0
1850	397,654	185,387	87.0
1840	212,267	180,628	571.0
1830	31,639	22,743	256.0
1820	8,896	4,134	87.0
1810	4,762	4,211	764.0
1800	551	.....	.....

The progress of the State in point of population during the period of one hundred and four years, is well summarized in Table II. From these figures, it will be seen, the most noticeable rate of increase occurred in the decade from 1830 to 1840, when the population increased from 31,639 to 212,267, or 570.9 per cent. It was during this decade that the territory became a State. Viewed as a whole, the progress of the State, as indicated by its growth in population, has been strong and constant from the time the first census was taken, growing, in little, more than a century, from less than 4,000 to over 2,500,000 inhabitants.

The population of the State at each census, from 1800 to 1904, inclusive, together with their increase, per cent of increase and average annual increase in population during each period is presented in Table III.

TABLE III.—*Increase and per cent of increase of the population of the State, 1800 to 1904.*

Census years.	Population.	Increase over previous census.	Increase in 10 years—U. S. censuses.	Increase in 10 years—State censuses.	Per cent of increase over previous census. 1904	2,530,016	109,034	.....	288,375	4.50	.....	12.86	27,258	.....	28,838

(a) Exclusive of Wayne county, which was returned with Ohio.
(b) Exclusive of soldiers in the field. "Had the soldiers in the field been enumerated in 1864, the increase from 1860 to 1864 would have been nearly 90,000, or about 12 per cent, and from 1864 to 1870, about 345,000, or 41 per cent."

DENSITY OF POPULATION.

The gross area (land and water surface) of Michigan, according to the United States report of 1900, was 58.915 square miles. As there has been no acquisition of territory since that date, this constitutes the present area of the State.

Computing the density of population, using land surface only, 57,430 square miles, there are in the State, June 1, 1904, on the average, 44.05 inhabitants to the square mile, a relative gain of one and nine-tenths as compared with 1900.

Arranged in their geographical order, the southern counties, comprising 17,474 square miles, average 84.79 inhabitants to the square mile; the central counties, 8,773 square miles, 51.43; the northern counties, 14,514 square miles, 22.16, and in the upper peninsula, 16,669 square miles, 16.53 inhabitants to the square mile.

Table IV gives, by counties, the land area of the State with average number of inhabitants to each square mile; together with comparative figures from the United States census of 1900.

TABLE IV.—*Population with areas, and average number of inhabitants to each square mile, arranged geographically. Comparative table.*

State and counties	Area in square miles.	Population.		Average population to each square mile.	
		1904.	1900.	1904.	1900.

CENTER OF POPULATION AND ITS MEDIAN POINT.

The center as regards number of inhabitants, and the center of population is the point north of which there are as many inhabitants as south, and east of which there are as many as west. For June 1, 1904, this point is found to be about two miles north and one-third of a mile east of the southwest corner of Bingham township, Clinton county. In 1894 this center was about one mile north and one and one-half miles east of the southwest corner of Bingham township, Clinton county, and in 1884 it was still farther south and east, in the township of Olive, which joins Bingham on the south. The rapid development of the resources of the upper peninsula and the consequent increase in population may easily account for the gradual shifting of this center to the north and west.

The "center of population" is the center of gravity of the population of the State, each individual being assumed to have the same weight. This center is found to be 61.05 miles north of the base line and 18.87 miles west of the principal meridian, or about 1 mile north and 0.87 of a mile west of the southeast corner of Sumner township, Gratiot county. In 1894 this center was about 1.76 miles south and 0.35 of a mile east of the northwest corner of Newark township, Gratiot county, and in 1884 about 1.30 miles north, and 2.30 miles east of the southwest corner of Fulton township.

In 1894 the center of population was about 8.93 miles north and 1.94 miles west of the center in 1884, and in 1904, about 2.81 miles north and 1.22 miles west of the center in 1894.

The method adopted for determining the center of population is the same as used in the two previous State censuses, and is as follows:

"The geographical center of each county was as accurately determined as possible, and the entire population of the county assumed to be at this center. The population of each county was then multiplied, first by the distance in miles of the county center from the base line, and then by its distance from the principal meridian. The aggregate of the products thus obtained north of the base line, and of those south of it, and also the aggregate of the products obtained east, and of those west of the principal meridian, were then separately ascertained. The difference between the aggregate of the products north and of those south of the base line, divided by the total population, gave the distance of the center of population from the base line, it being north of this line because the aggregate of the products north was greater than of those south. In like manner the difference between the aggregate of the products east and of those west of the principal meridian, divided by the total population of the State, gave the distance of the center of population from the principal meridian, it being west of this meridian, because the aggregate of the products west was greater than of those east."

A summary of the results obtained in making the computations for determining the center of population in 1904 is as follows:

Aggregate of products north of base line	169,362,928
Aggregate of products south of base line	14,917,090
Excess of products north of base line	154,445,838

Excess divided by population of State gives 61.05 miles, the distance north of the base line.

Aggregate of products west of principal meridian	100,362,604
Aggregate of products east of principal meridian	56,632,810
Excess of products west of principal meridian	47,729,794

Excess divided by population of the State gives 18.87 miles, the distance west of the principal meridian.

POPULATION OF COUNTIES.

The State, as shown by the census of 1904, is divided into 83 subdivisions or counties as compared with 85 similar divisions in 1894. Isle Royal, which for judicial purposes was at that time attached to Houghton county and not separately enumerated, became a part of Keweenaw county in 1897. The townships of Manitou county, upon the disorganization of that county in 1895, were annexed to Charlevoix and Leelanau counties respectively.

(a) Includes Manitou county annexed to Charlevoix and Leelanau counties since 1894.
(b) Includes Isle Royal county since disorganized and made a part of Keweenaw county.

In Table V is shown the increase and decrease in population, by counties, comparison being made between the census of different years since 1890. It is noticeable that the major portion of the decrease in population from 1900 to 1904 is found in the purely agricultural counties in the southern part of the State. On the other hand the increase is found either in counties having one or more cities or in the newer counties in the upper part of the State where the land is being taken up by settlers. The table shows very plainly the tendency of the population to drift towards the cities but the extent of the change can be more accurately determined by referring to the table comparing rural and urban population.

POPULATION OF INCORPORATED CITIES AND VILLAGES.

In accordance with the provision of the Census Act by which a separate enumeration of all incorporated places was required, an effort was made to insure a complete return of the population of each incorporated city and village. The list herewith presented in Table VI, comprising 415* places, includes every incorporated city and village in the State.

*The village of Attica, whose articles of incorporation are still a matter of State record, but whose *local charter has long since* been revoked; also the villages of Daggett and New Boston included in *this number, were not separately* returned.

Of the 415 incorporated places in the State, June 1, 1904, there are 87 cities with an aggregate population of 1,036,249, and 328 villages containing 293,717 inhabitants. The combined population, 1,329,966 persons, constituting over one-half, or 52.5 per cent, of the entire population of the State; while the cities enumerated contain 41 per cent.

TALBE VI.—*Number and population of incorporated places, classified by size.*

Classified sizes.	Number of places.	Population.
STATE	412	1,329,966
Places of 50,000 and over	2	413,309
Places of 25,000 and under 50,000	4	129,336
Places of 20,000 and under 25,000	4	83,419
Places of 10,000 and under 20,000	14	166,332
Places of 5,000 and under 10,000	21	139,870
Places of 2,500 and under 5,000	31	114,582
Places of 1,000 and under 2,500	111	163,442
Places of 500 and under 1,000	118	81,566
Places under 500	107	38,115

The population of the incorporated cities at the various census periods together with the increase in number and per cent of total population is shown by Table VII.

TABLE VII.—*Number, population and per cent of total population of incorporated cities, 1864-1904.*

Census years.	Number of incorporated cities.	Population.	Per cent of total population.
1904	87	1,036,249	41
1900	78	939,058	38
1894	70	821,051	37
1890	60	709,657	34
1884	49	509,277	27
1880	43	388,863	24
1874	38	324,771	24
1870	29	230,372	19
1864	19	130,158	16

The ten large cities of the State, viz., Detroit, Grand Rapids, Saginaw, Kalamazoo, Bay City, Jackson, Battle Creek, Muskegon, Lansing and Port Huron, having 20,000 inhabitants or more, in all an aggregate of 626,059 persons, represent 60.4 per cent of the total city population. Of these cities, Detroit in point of population, is the premier city of the State, a position which it has uniformly held. It furthermore represents, with Cleveland, Buffalo, San Francisco, Cincinnati and Pittsburg, one of the six large cities of the United States having a population of between 300,000 and 400,000 each.

Grand Rapids and Saginaw, the next largest cities in the State, have not changed their rank in 1904 as compared with 1900. Bay City, the fourth in population in 1900, was passed by Kalamazoo in 1904; while Jackson occupies the sixth place. Battle Creek, which, in 1894, held the tenth place, shows a material increase, taking precedence over Muskegon. Muskegon, Lansing and Port Huron, in point of population, fol-

low in order named. The most notable increase in population which has taken place in 1904 as compared with 1900 may be found in Lansing, which shows the greatest per cent of increase of any of the ten large cities.

In Table VIII is given an alphabetical list of the incorporated cities and villages of the State.

RURAL AND URBAN POPULATION.

There are in the State, June 1, 1904, 87 cities with a population of 1,036,249, which is 41 per cent of the total population of the State.

At this same date there are 328 incorporated villages, the total population of which is 293,717, or 12 per cent, of the total population of the State.

The remainder of the inhabitants of the State, numbering 1,200,050, are classified as "rural." There is included in this class, however, all the inhabitants of unincorporated villages, so that the strictly rural population is somewhat less than the 47 per cent, as shown by the classification adopted.

From the following table it will be seen that the population of villages has made nearly an average growth during the past ten years, the population having increased from 11 to 12 per cent. There has been a considerable increase in the population of cities and a corresponding decrease in the rural population during the past decade.

TABLE IX.—*Rural and urban population, with per cent of total population.*

Classes of population.	1904.		1894.	
	Number.	Per cent of total.	Number.	Per cent of total.
Total	2,530,016	100	2,241,641	100
All cities	1,036,249	41	821,051	37
All villages	293,717	12	255,508	11
Rural	1,200,050	47	1,165,082	52

THE SEXES.

Of the 2,530,016 people in Michigan, June 1, 1904, 1,298,654 or 51.3 per cent, are males, and 1,231,362 or 48.7 per cent, are females.

The percentages for 1904, compared with similar percentages for other census years beginning with 1874, are as follows:

TABLE X.—*Percentage of male and female of total population, 1874 to 1904.*

Census years.	Total population.	Males.	Females.	Per cent of total population.	
				Males.	Females.
1904	2,530,016	1,298,654	1,231,362	51.3	48.7
1894	2,241,641	1,160,540	1,081,101	51.8	48.2
1884	1,853,658	974,468	879,190	52.6	47.4
1874	1,334,031	697,298	636,733	52.3	47.7

Table X shows the males to be in excess of the females, but in a constantly diminishing proportion, the females having increased during the various decades at a slightly greater rate than the males, owing, no doubt, to the change in character of immigration. It will be noted, by comparisons of the respective tables, that this relative increase of females is made up of foreign-born females. This seems to be the natural outcome of commercially prosperous times, the foreign-born males becoming able to send for their families from across the seas.

TABLE XI.—*Excess of males with per cent of total population, 1874 to 1904.*

Census years.	Total population.	Males.	Females	Excess of males.	
				Number.	Per cent of total population.
1904	2,530,016	1,298,654	1,231,362	67,292	2.66
1894	2,241,641	1,160,540	1,081,101	79,439	3.54
1884	1,853,658	974,468	879,190	95,278	5.14
1874	1,334,031	697,298	636,733	60,565	4.54

Table XI considers the excess of males with reference to the proportion which they bear to the whole number of persons.

At the present census the females constitute 48.7 per cent of the total population, or substantially, the same proportion as shown for the equivalent areas in the United States census of 1900. The excess of females in the State is confined to six counties, viz: Calhoun, 219; Jackson, 12; Lenawee, 485; St. Joseph, 205; Washtenaw, 212; Wayne, 3,427. In 1900 there was an excess of females in seven counties, Calhoun, 447; Kalamazoo, 408; Kent, 258; Lenawee, 412; St. Joseph, 169; Washtenaw, 259, and Wayne, 4,923.

"In 1854 the female population of Emmet county exceeded the male population by 76, and in 1874 the females outnumbered the males in Wayne county by 291, and in 1880, by 610. In 1864 there were more females than males in the counties of Calhoun, Wayne, Oakland, St. Joseph and Washtenaw." It is stated, in the census report of 1894, that the instances noted are the only ones, at the census of 1854 or since, previous to 1890, where the female population of a county has outnumbered the male population.

Table XII shows the per cent of each sex to the total population of both sexes in the years 1904-1900-1894-1890.

TABLE XII.—*Percentage of males and females of total population. Comparative tables.*

(a) Manitou county, since disorganized, reported 53.92 per cent males, and 46.08 per cent females in the census of 1894, to the U. S. census of 1890, 55.70 per cent males and 44.30 per cent females.
(b) Isle Royal county, disorganized in 1897, reported 93.33 per cent males, and 6.67 per cent females in the U. S. census of 1890.

In the 87 cities of the State, with an aggregate population of 1,036,249, we find 511,229, or 49.3 per cent, males and 525,020, or 50.7 per cent, females as compared with 49.6 per cent males and 50.4 per cent females in the 70 cities in 1894.

GENERAL NATIVITY.

The whole number of persons of native birth in 1904, as shown by Table IV of the general tables, is 1,983,155, or 78.4 per cent, of the total population as compared with a total, in 1900, of 1,879,329, or 77.6 per cent. The foreign born now number 546,861, or 21.6 per cent, as against a total for the same area, in 1900, of 541,653, or 22.4 per cent.

TABLE XIII.—*Population classified, as to general nativity, and per cent of total population, 1880-1904.*

Census years.	Total population.	Native born.	Foreign born.	Per cent total population.	
				Native born.	Foreign born.
1904	2,530,016	1,983,155	546,861	78.4	21.6
1900	2,420,982	1,879,329	541,653	77.6	22.4
1894	2,241,641	1,670,786	570,855	74.5	25.5
1890	2,093,889	1,550,010	543,880	74.0	26.0
1884 (a)	1,853,658	1,364,292	489,366	73.6	26.4
1880	1,636,937	1,248,429	388,508	76.3	23.7

(a) The nativity of the persons reported as "unknown" has been estimated at the same per cent and included in these figures.

In Table XIII the population has been classified according to the number of native and of foreign birth, and statistics relating to these two elements for each census from 1880 to 1904, inclusive.

TABLE XIV.—*Native and foreign born population arranged geographically, 1904-1894*

Geographical divisions.	1904.					
	Aggregate native and foreign population.		Native.		Foreign.

Upper peninsula	206,590	9.2	110,397	53.4	96,193	46.6

A distribution of the figures representing the native and foreign born elements, by geographical divisions at the last two State census periods, is presented in Table XIV. It will be noted, from the various tables shown, that there has been an increase in the total population of the State during the past decade of 288,375, or 12.9 per cent; also, that there has been an increase in the native element of 312,369, or 18.6 per cent; while there has been a decrease of 23,994, or 4.2 per cent, in the foreign born inhabitants.

This census reports the upper peninsula division to be the only section of the State in which the foreign element shows an increase in numbers. Of the total foreign-born population enumerated, 19.7 per cent are found in these upper peninsula counties, showing an increase in the last ten years of 11,773, or 12.2 per cent. However, although the actual number of foreign born has increased in this portion of the State, the percentage of foreign born to the total population in this section has decreased from 46.6 per cent to 39.2 per cent.

TABLE XV.—*Relative decrease in foreign born of the State, arranged geographically, 1904 to 1894.*

Geographical divisions.	1904.	1894.	Decrease from 1894 to 1904.	
			Number.	Per cent.
STATE	546,861	570,855	23,994	4.2
Southern counties	274,576	280,046	5,470	1.9
Central counties	95,822	117,920	22,098	18.7
Northern counties	68,497	76,696	8,199	10.7
Upper peninsula	107,966	96,193	*11,773	*12.2

* Increase.

The full purport of this change in the distribution of foreign population throughout the State may be seen from the above table.

In Table XVI the increase and decrease in the native and foreign-born population by counties, since 1900 and 1894, is given. During the last four years all but 11 counties have made an increase in the native population. Nine of these 11 counties are in the southern part of the State, and are largely agricultural counties containing but few, if any, cities. During the last ten years there has been a decrease in the native population in 9 counties, 7 of which are in the southern part of the State. The foreign-born population for the same period shows a decrease; while the enumerations of 1900 and 1904 give a slight increase. Most of this increase in foreign born, as in the census periods of 1894 to 1904, is found to be in the counties of the upper peninsula; part in the northern section of the lower peninsula; also, a few counties in the southern portion of the State containing large cities.

(a) Totals include 672 native and 246 foreign reported in Manitou county in 1894.

The incorporated cities of the State have a population of 1,036,249. Of this number 759,375, or 73.3 per cent, are native born, and 276,874, or 26.7 per cent, are foreign born. In the 328 villages, with an aggregate population of 293,717, there are found 244,620, or 83.3 per cent, native, and 49,097, or 16.7 per cent, foreign born.

The remainder of the State, or the rural population, after excluding all incorporated places, enumerates 1,200,050. This is made up of 979,160, or 81.6 per cent, native born, and 220,890, or 18.4 per cent, foreign-born inhabitants. The incorporated cities contain, therefore, more than two-fifths, or 40.9 per cent, of the total population, and over one-half, or 50.6 per cent, of all the foreign born, according to enumeration of 1904. This shows the foreign element is largely concentrated in the cities of the State, as will be seen from the following table presented.

TABLE XVII.—*Proportion of foreign born population in the cities, villages and rural districts of the State.*

State.	Total population.		Total foreign born.		Per cent of total population.		Per cent of total foreign born.		Per cent of foreign born of total population.	
	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.
STATE.....	1,298,654	1,231,362	294,718	252,143	100.0	100.0	100.0	100.0	22.7	20.5
Cities.....	511,229	525,020	140,897	135,977	39.4	42.6	47.8	53.9	27.6	25.9
Villages.....	145,107	148,610	26,292	22,805	11.2	12.1	8.9	9.1	18.1	15.3
Rural.....	642,318	557,732	127,529	93,361	49.4	45.3	43.3	37.0	19.9	16.7

The proportion of native and foreign-born inhabitants in the incorporated cities of the State, at the several censuses, has been as follows:

Census years.	Native.	Foreign born.
1904.....	73.3	26.7
1900.....	72.1	27.9
1894.....	67.2	32.8
1890.....	65.7	34.3
1884.....	64.4	35.6
1880.....	65.9	34.1

The incorporated cities of the State, classified as to sex and general nativity, will be found in Table V (page 67) of general tables. Divided in similar divisions, an alphabetical list of the 328 villages is given in Table XVIII.

TABLE XVIII.—*The incorporated villages of the State, classified by sex, and general nativity.*

General Tables IV, V and VI present in detail the sex and general nativity of the population of the State with major and minor divisions.

COLOR.

A detailed presentation of the white and colored population of the State is made by counties, cities, and major and minor divisions in Tables VII, VIII and IX of general tables. From these tabulations it appears that the inhabitants of the entire area of enumeration in 1904 are composed of 2,509,629 white persons and 20,387 colored persons, the latter figures comprising 14,206 persons of negro descent, 5,935 Indians, 235 Chinese, and 11 Japanese, representing in the aggregate 2,530,016 persons, the entire population of the State.

The race and color of the population of the State as returned in 1894-1900 and 1904, together with the increase and per cent of increase in each element, is presented in the following table:

TABLE XIX.—*Total population of each race and color in Michigan, with increase and per cent of increase, 1894, 1900 and 1904.*

Race and color.	1904.	1900.	1894.	Increase 1900 to 1904.		Increase 1894 to 1904.	
				Number.	Per cent.	Number.	Per cent.

Chinese	235	.02	240	.02	(a) 150	.01
Japanese	11	.00	9	.00	7	.00

(a) Includes 12 Arabians.

TABLE XX.—CONCLUDED.—*Per cent of the population of each race and color, of total population, 1880 to 1904.*

Race and color.	1890.		1884.		1880.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
STATE	2,093,889	100.00	(b) 1,853,658	100.00	1,636,937	100.00
White	2,072,884	98.99	1,830,480	98.81	1,614,560	98.64
Negro	15,223	.73	15,123	.82	15,100	.92
Indian	5,624	.27	6,900	.37	7,249	.44
Chinese	120	.01	70	.00	27	.00
Japanese	38	.00	.....	.....	1	.00

(b) Includes 1 [illegible] unknown.

It will be seen from the foregoing schedules that of the entire population of the State returned in 1904, the white element constitutes 99.2 per cent and the colored eight-tenths of 1 per cent. The negro element by itself constituting six-tenths of 1 per cent, this race showing a steadily decreasing proportion of the total population. The Indian population likewise, is gradually diminishing; while the Chinese and Japanese enumerated mark a slight increase. The following table shows the number of each race and color in the State, by counties, as returned at the censuses of 1890, 1894, 1900 and 1904:

TABLE XXI.—*The population of the State, classified as to race and color, for the years 1890, 1894, 1900, and 1904, counties.*

(a) Includes 106 enumerated in Manitou county in 1894.
(b) Includes 56 enumerated in Manitou county in 1890.
(c) Not separately returned in 1890 or 1894.

In the city population of the State of 1,036,249 inhabitants, 1,026,381, or 99.05 per cent, are white and 9,868 or 0.95 per cent, are colored, the latter comprising 9,134 persons of negro descent, 537 Indians, 187 Chinese, and 10 Japanese. From this it will be seen that of the total colored inhabitants of 20,387, 48.4 per cent, are located in the cities.

AGES.

The population of the State classified by sex, together with comparative tables of 1900 and 1894, is distributed by single years of age in Table X of general tables. A distribution of the population by single years of age, subdivided according to sex and general nativity is given by counties in general Tables XI and XII. These two presentations of ages in detail are followed by Tables XIII, XIV, XV, XVI, XVII and XVIII inclusive, in which the ages of the population are given by periods of years, classified according to sex and nativity for the counties, incorporated cities, and major and minor divisions of the State. Tables XIX to XXIII inclusive, give in age periods the ages of the white and colored population. A distribution of the population by quinquennial age groups, classified according to sex and nativity is made in Table XXII.

In considering the changes which have taken place in the age distribution *of the population* enumerated in 1904, the difference in the com-

position of the native and foreign born elements in the past ten years makes a comparison of their age distribution of little value. The foreign born population is made up largely of young adults, and persons of more advanced years; while the native population contains a large proportion of children, children of native Americans, also children of the immigrant element of our inhabitants. There has been, as we have observed from previous schedules presenting the foreign element, a decrease since 1894 in the number of immigrants to the State, consequently a varying change in the distribution of this element. The table following shows by per cent of total, the proportion of the total population at each age period, and the proportion of the native and foreign born respectively, for the years 1904 and 1894:

TABLE XXIII.—*Proportion of the total population at each age period, by per cent of total, and proportion of native and foreign born, 1904, 1894.*

Ages in periods of years.	Per cent of number at each period of age to the number at all ages of same nativity.

Referring to these figures we find that 2.27 per cent of the total population in 1904 are under one year of age; 2.89 per cent of the total are native, while only 0.06 per cent of the foreign born are in this age period. It is also shown that 33.40 per cent or over one-third of the total population are fifteen years of age or under. In like manner it may be seen that 40.95 per cent of the native inhabitants as compared with 6.10 per cent foreign born persons are 15 years of age or under. The percentage of native being more than six and one-half times that of the foreign born population.

Table XXIV shows the total number and number of each sex, at each age period, of the native *and foreign born* population in 1904.

(a) Manitou county, since disorganized, reported in 1894, 27.60 males and 23.92 females.

PARENT-NATIVITY.

From the information secured in the census of 1904 concerning the nationality of parents of each person enumerated, of the 2,530,016 inhabitants in the State the nativity of both parents is reported for 2,446,748 persons, leaving 83,268 for whom the parentage of one or both parents is unknown. Of the nativity of both parents reported, there are 1,070,767 persons of native parentage or 42.3 percent, of the entire population enumerated, as compared with 911,806 or 40.7 percent, for the census of 1894. There are 1,060,209 persons of foreign parentage or 41.9 percent, of the total number as against 1,004,931 or 44.8 percent, ten years ago; while 315,772 or 12.5 percent, of the total inhabitants of the State have one parent of native birth and one parent of foreign birth. In 1894, 258,474 or 11.4 percent, of the total population were of mixed parentage. These figures show that at the present census nearly one-half of the entire population of the State is made up of persons of foreign parentage.

TABLE XXVI.—*Parent-nativity of the native and foreign born population in the State.*

Parent-nativity.	Population.			Nativity of parents.																	
				Native.		Foreign.		Foreign father, native mother.		Foreign mother, native father.		Father unknown.				Mother unknown.				Both unknown.

Foreign born	276,874	140,897	135,977	1,439	1,364	130,441	126,485	2,560	3,198	1,922	2,294	115	104	172	132	63	41	251	162	3,934	2,197
Country outside of cities	1,493,767	787,425	706,342	363,293	346,366	297,635	248,461	61,304	57,915	37,310	34,965	4,492	3,924	1,029	869	3,831	2,655	1,646	1,041	16,885	10,146
Native	1,223,780	633,604	590,176	361,528	344,964	152,451	138,680	59,499	56,422	34,850	32,838	4,388	3,866	791	684	3,695	2,590	1,298	850	15,104	9,282
Foreign born	269,987	153,821	116,166	1,765	1,402	145,184	109,781	1,805	1,493	2,460	2,127	104	58	238	185	136	65	348	191	1,781	864

From the various schedules presented it appears that of the portion of the population having one parent of native and one of foreign birth, there are 195,942 persons having foreign born fathers, as compared with 119,830 persons having foreign born mothers, an excess of those having foreign born fathers of 76,112. This excess is offset by a corresponding excess of native born mothers showing there has been a larger proportion of marriages between foreign born men and native women, than there has been between foreign born women and males of native birth. This condition however, is a natural sequence owing to the male immigrant element which is largely composed of adults.

Wexford	3,414	32	0.94	3,281	96.10	101	2.96

The foreign born element of 546,861 persons reviewed in a similar manner shows 5,970 inhabitants of native parentage; 511,891, foreign; 17,859 of mixed parentage and 11,141 persons with one or both parents unreported.

By referring to Table XXVI it will be seen that the incorporated cities of the State contain 361,108 or 33.7 per cent, of the total population with native parentage, 514,113, or 48.5 per cent, of total foreign parentage, while 124,278 persons, or 39.3 per cent, of the total number in the State are of mixed parentage. Of the number in the State of whose parentage one or both parents are unknown 36,750, or 44.1 per cent, are located in the cities. These tabulations show, as have previous tables, the concentration of the foreign element in the cities of the State.

CONJUGAL CONDITION.

The statistics of conjugal condition in 1904 are presented in Tables XXX to XXXV inclusive, (pages 478-547) of general tables. It should be remembered, however, that the information collected shows only the number who were reported as single, married, widowed and divorced persons on June 1, 1904, no attempt being made to ascertain the number of widowed and divorced persons who, having remarried, are reported in the census as married. As in all enumerations the figures relating to conjugal condition are not absolute. Information as to *those married* and unmarried ofttimes being incorrectly reported, partly

through unintentional misstatements and partly through a desire to conceal the real facts.

The conjugal condition of the aggregate population of the State by sex, as returned for the entire area of enumeration is presented in Table XXXIII.

TABLE XXXIII.

Conjugal condition.	Aggregate.		Males.		Females.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
STATE	2,530,016	100.0	1,298,654	100.0	1,231,362	100.0
Single	1,340,377	53.0	720,960	55.5	619,417	50.3
Married	1,053,177	41.6	529,846	40.8	523,331	42.5
Widowed	123,264	4.9	40,940	3.2	82,324	6.7
Divorced	9,811	0.4	4,612	0.4	5,199	0.4
Unknown	3,387	0.1	2,296	0.1	1,091	0.1

From these tabulations it will be seen that of the 2,530,016 persons living in the State June 1, 1904, 1,340,377, or 53.0 per cent, are single; 1,053,177, or 41.6 per cent, are married; 123,264, or 4.9 per cent, are widowed; 9,811, or four-tenths of 1 per cent, are divorced and 3,387, or one-tenth of 1 per cent, are of unknown conjugal condition. In the subdivision of these classes by sex, a greater proportion of unmarried appears among males than females, 55.5 per cent for the former as against 50.3 per cent for the latter. This difference it will be seen is offset by a larger proportion of married and widowed females.

In considering the conjugal condition of the total population, as shown by Table XXXIII, it should be remembered that children, as well as adults, are included, the age constitution affecting somewhat, the relative proportion of single and married persons. For the purpose of making a more exact comparison of the statistics of conjugal condition we exclude from consideration in Table XXXIV the number of persons under 15 years of age reported as single, and present comparative figures for 1900 and 1904, showing for all persons in the State 15 years of age or over, the number and percentage of single, married, widowed, divorced, and unknown males and females, respectively, in each element of the population.

From these compilations we find in the State 893,734 males and 839,543 females; 614,072 native males and 279,662 of foreign birth; while there are 601,773 native females and 237,770 females foreign born. It also appears that from both the native and foreign elements there is a slightly decreased proportion of unmarried persons among males and females; while there has been an increase in both instances in the married population. The number of widowed and divorced persons varying but slightly in the past four years, as is the case for each sex and each element of the population in 1904 for which the conjugal condition is given as "unknown."

TABLE XXXIV.—*Conjugal condition of persons 15 years of age and over, classified by sex and general nativity, 1900, 1904.*

Conjugal condition.	1904.				1900 (a).

Single	66,957	24.0	34,626	14.6	75,200	26.7	36,663	15.8
Married	192,779	68.9	168,512	70.9	188,438	66.8	163,817	70.7
Widowed	17,324	6.2	32,829	13.8	16,537	5.8	30,112	13.0
Divorced	1,119	0.4	1,218	0.5	1,014	0.4	918	0.4
Unknown	1,483	0.5	585	0.2	737	0.3	303	0.1

(a) The colored population not classified as to general nativity in 1900, has been estimated and included in these figures.

The proportion of divorced to married, classified by sex and general nativity is given in the above table.

TABLE XXXV.—*Number of divorced and married persons, and percentage of divorced to married for the State.*

General nativity.	Married.			Divorced.			Per cent of divorced to married.		
	Total.	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.
STATE	1,053,177	529,846	523,331	9,811	4,612	5,199	0.9	0.9	1.0
Native born	691,886	337,067	354,819	7,474	3,493	3,981	1.1	1.0	1.1
Foreign born	361,291	192,779	168,512	2,337	1,119	1,218	0.6	0.6	0.7

These returns, as previously stated, should not be accepted as a true estimate of the prevalence of divorce among the different elements of population throughout the State. Assuming these reports in respect to divorced persons are as accurately gathered as in any general enumeration, we submit a comparison of the relation which the number *of persons reported* divorced bears to the number of persons reported as married in this census.

In the incorporated cities of the State, of the number 15 years of age or over, we find 242,562 single persons; 402,307, married; 53,588, widowed; 4,319, divorced and 1,932 of the number whose conjugal condition is unknown. These tabulations classified as to sex and general nativity will be found in Table XXXVI.

TABLE XXXVI.—*Conjugal condition of persons, 15 years of age or over, classified by sex and general nativity for the incorporated cities of the State.*

Conjugal condition.	Males.		Females.	
	Number.	Per cent.	Number.	Per cent.
All cities	353,137	100.0	369,571	100.0
Single	126,109	35.7	116,453	31.5
Married	210,133	59.5	210,174	56.9
Widowed	13,967	4.0	39,621	10.7
Divorced	1,619	0.5	2,700	0.7
Unknown	1,309	0.3	623	0.2
Native born	221,608	100.0	242,700	100.0
Single	94,822	42.8	93,214	38.4
Married	118,102	53.3	125,747	51.8
Widowed	6,915	3.1	21,402	8.8
Divorced	1,124	0.6	1,954	0.8
Unknown	645	0.2	383	0,2
Foreign born	131,529	100.0	126,871	100.0
Single	31,287	23.8	23,230	18.3
Married	92,031	69.9	84,427	66.5
Widowed	7,052	5.4	18,219	14.4
Divorced	495	0.4	746	0.6
Unknown	664	0.5	240	0.2

Referring to these figures it will be seen that the per cent of single native males far exceeds the unmarried foreign males; while the foreign married male population is in excess of the native, a similar condition existing in the female population.

A presentation of the married and divorced condition in the cities is given in Table XXXVII.

TABLE XXXVII.—*Number of divorced and married persons, and percentage of divorced to married for the incorporated cities.*

General nativity.	Married.			Divorced.			Per cent of divorced to married.		
	Total.	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.
All cities	420,307	210,133	210,174	4,319	1,619	2,700	1.0	0.8	1.3
Native born	243,849	118,102	125,747	3,078	1,124	1,954	1.3	1.0	1.6
Foreign born	176,458	92,031	84,427	1,241	495	746	0.7	0.5	0.9

CITIZENSHIP.

MALES OF VOTING AGE.

The males of voting age in the State June 1, 1904, are 747,245, or 29.5 per cent of the total population. While this number represents from the standpoint of age, eligibility to vote, or the potential voting strength of the State, it does not however, take into consideration any other qualification and hence does not necessarily mean the actual number of voters in the State. On this basis we find the potential voting strength of Michigan constitutes 485,279, or 64.9 per cent, native element and 261,966, or 35.1 per cent, foreign, as compared with 457,353, or 63.6 per cent native males and 262,125, or 36.4 per cent foreign born in 1900, the latter showing a slight decrease in the proportion of foreign voters.

TABLE XXXVIII.—*Males of voting age, with number and per cent of increase, 1894, 1904.*

General nativity.	Males of voting age.		Increase from 1894-1904.	
	1904.	1894.	Number.	Per cent.
Aggregate	747,245	651,920	95,325	14.6
Native	485,279	393,225	92,054	23.4
Foreign	261,966	258,695	3,271	1.3

In Table XXXVIII it appears there has been an increase in males of voting age in the past ten years of 95,325, or 14.6 per cent, as compared with an increase in the general population of 12.8 per cent.

TABLE XXXIX.—*Percentage of potential voters of total population; total males and average number of persons to each potential voter.*

General nativity.	Total population.	Total males.	Potential voters.	Percentage of potential voters of total population.	Percentage of potential voters of total males.	Average number of persons to each potential voter.
STATE	2,530,016	1,298,654	747,245	29.5	57.5	3.3
Native	1,983,155	1,003,936	485,279	24.5	48.3	4.1
Foreign	546,861	294,718	261,966	47.9	88.8	2.1

In a comparison of the number of potential voters with the total population in 1904, it is seen that there are, on the average, 3.1 persons to each potential voter. In Table XXXIX is given the ratio of potential *voters to the total* population in each element; also the percentage of *potential voters of total* population and total males, classified as to *general nativity.*

TABLE XL.—*Total number, the number of native and foreign born males of voting age, and per cent of each to total number, 1894, 1904, counties.*

(a) Includes 147, or 53.45 per cent native and 128, or 46.55 per cent foreign, reported in Manitou county.

Table XL shows for the State and counties the total number, the number of native and foreign born males of voting age, and the per cent of the native and foreign born to the total number. In considering the "Citizenship" of the male population twenty-one years of age and over, we find the 747,245 potential voters of the State constitute 485,279 native voters, 215,256 naturalized voters and 46,710 who have taken no steps towards naturalization and hence, compose the alien element of our population. Of the total foreign born males of voting age 215,256, or 82.2 per cent, are naturalized and 46,710, or 17.8 per cent, are alien.

The voting strength of the cities of Michigan constitutes an aggregate of 294,723 males, or 39.4 per cent of the entire potential vote of the State, on the average, 3.8 persons of the total city population to each potential voter. The total native vote in the cities is 172,511, or 58.5 per cent, of the entire male population of voting age, while 122,212, or 41.5 per cent, comprises the voting foreign element. Table XLI shows for the incorporated cities, the total number, the number of native and foreign born males of voting age, and the per cent of native and foreign born to the total number. In the classification of "Citizenship" in the cities of the State we find the 294,723 eligible voters are made up of 172,511 native voters, 98,967 naturalized voters and 23,245 aliens. The total foreign element of voting age in the cities is composed of 98,967, or 80.9 per cent, naturalized voters and 23,245, or 19.1 per cent alien. This shows that 49.7 per cent of the total number in the State who have not taken out naturalization papers are located in the cities.

Tables XXXVI, XXXVII and XXXVIII inclusive (pages 548 to 610) of general tables present in detail the male population of voting age, by counties, incorporated cities, and major and minor divisions of the State.

TABLE XLI.—*Total number, the number of native and foreign born males of voting age, and per cent of total number, 1894, 1904, incorporated cities.*

MALES OF MILITIA AGE.

The natural militia ages are from 18 to 45 years, the number of the male population returned in these ages in the State is presented in detail in Tables XXXVI, XXXVII and XXXVIII of general tables. These tables give for the entire area of enumeration in 1904 a total of 546,730 males of militia age, or 42.1 per cent, of the total male population.

TABLE XLII.—*Males of militia age, number and per cent of increase, 1894, 1904.*

General nativity.	Males of militia age.		Increase from 1894 to 1904.	
	1904.	1894.	Number.	Per cent.
STATE	546,730	484,937	61,793	12.8
Native born	389,444	318,348	71,096	22.3
Foreign born	157,286	166,589	9,303	5.5

A comparison with similar percentages for 1894 shows an increase in the militia age of the State of 61,793, or 12.8 per cent. The general nativity of the males constituting the militia age in 1904 consists of 389,444, or 71.2 per cent, native element, and 157,286, or 28.8 per cent, foreign born element. While the foreign born of militia age constitutes a smaller proportion of the whole number of such persons, there is a relative increase in the proportion of native born males.

The following summary gives the general distribution of the males of militia age in the State:

TABLE XLIII.—*Number and per cent of the militia ages in the State, classified as to general nativity.*

State.	Aggregate.		Native.		Foreign born.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
STATE	546,730	100.0	389,444	71.2	157,286	28.8
Incorporated cities	230,316	42.1	150,524	65.3	79,792	34.7
Villages and rural districts	316,414	57.9	238,920	75.5	77,494	24.5

From the preceding table it will be seen that, while the cities of the State contain less than one-half of the total militia ages, they comprise over 50 per cent of the entire foreign element in the State constituting this age.

PERSONS OF SCHOOL AGE.

By a provision of the "Compiled Laws" of the State, regulating the age limit, the "persons of school age" in Michigan comprise all persons from 5 to 19 years of age, inclusive. The number of persons as thus defined, in the State, counties, and incorporated cities in 1904 is presented in detail by sex and general nativity, in Tables XXXIX, XL and XLI of general tables. From these tabulations it appears there are 776,684 persons of school age in 1904, this compared with 744,817* persons in 1900; the number reported 5 to 19 years inclusive, in the last U. S. Census, represents an increase of 31,867, or 4.2 per cent, in the school age of the State in the past four years.

TABLE XLIV.—*Number and per cent of persons in the State of primary school age, classified by general nativity, 1904.*

State.	5 to 19 years—primary school age.					
	Aggregate.		Native.		Foreign.	
	Number.	Per cent.	Number.	Per cent.	Number.	Per cent.
STATE	776,684	100.0	725,199	100.0	51,485	100.0
Incorporated cities	312,381	40.2	280,973	38.7	31,408	61.0
Villages and rural districts	464,303	59.8	444,226	61.3	20,077	39.0

Of the 776,684 persons reported of primary school age June 1, 1904, 393,057 are males and 383,627 are females. The native born element, consisting of 366,805 males and 358,394 females, an aggregate of 725,199, or 93.4 per cent, of the total primary school age, shows an increase over the native of 1900 of 34,873, or 5.1 per cent. While in the foreign born population of school age, numbering 26,252 males, and 25,233 females, there is found a decrease of 3,006, or 5.5 per cent. This being a very material falling off in the proportion of foreign born persons of school age, a condition similar to that found among the foreign element as a whole.

* The number reported by the U. S. Census of 1900, viz.: 726,547 native and 63,728 foreign born, includes persons twenty years of age; deducting from these figures the number of persons found in this age period as shown by the age schedule, 36,221 native, and 9,237 foreign born, we have comparative figures

Table XLVI shows by sex the number of persons in the State and counties of primary school age, 5 to 19 years inclusive, with the per cent of the total number of the total population; the per cent of males of school age to total males; also the per cent of females to total female population.

In the incorporated cities of the State, as will be seen by referring to Table XLIV, are found 312,381 persons, or 40.2 per cent, of the total population of school age. Of this number 154,264 are males and 158,117 females, while further computations show that 10.1 per cent of the aggregate population of school age in the cities are of foreign birth, and that 61.0 per cent of the total foreign population of primary age in the State is centered in the cities.

A distribution of the males and females of school age, with percentages of same to total population of each for the incorporated cities of the State, is given in the above table.

SCHOOL ATTENDANCE.

A detailed presentation of the number of persons of primary school age attending school in the State during the year of 1904, is made in Tables XLII and XLIII (pages 672-675) of general tables. These statistics show the whole number of persons in the State for whom school attendance is reported, to be 497,299 persons, or 64.2 per cent, of the total population of school age. Of this number reported in attendance, 248,742 are males and 248,557 females. These figures compared with the tabulations of the U. S. Census of 1900, 232,881 males and 231,845 females, an aggregate of 464,726, mark an increase of 32,573, or 7 per cent, in the past four years; while compared with the school attendance shown by the State census of 1894 reporting 474,672 persons, exhibit an increase of only 22,627 or 4.8 per cent in the past decade. Comparisons, however, with the results of preceding censuses should not be made unreservedly; lack of uniformity in age limits, and omission from the present compilations of private and parochial schools, should be taken into consideration.

TABLE XLIX.—*Number of persons of primary school age, school attendance and per cent of same to total number of persons of primary school age.*

State.	Total number of persons primary school age.		Total number of persons attending school.		Per cent of school attendance of total number of persons of primary school age.	
	Males.	Females.	Males.	Females.	Males.	Females.
STATE	393,057	383,627	248,742	248,557	63.3	64.8
Incorporated cities	154,264	158,117	87,080	89,735	56.4	56.7
Incorporated villages and rural districts	238,793	225,510	161,662	158,822	67.7	70.4

From the above table we find 176,815, or 35.5 per cent, of the total school attendance reported in Michigan is centered in the incorporated cities, leaving 320,484, or 64.5 per cent, the greater proportion, enrolled in the village and rural school districts of the State.

The school attendance in the State and incorporated institutions of Michigan reported for the academic year 1903-1904, in Table XLIV of general tables, numbers 19,725 persons. Of this number 7,941 are students in the State educational institutions; 9,593 are classified in the incorporated schools of the State, and 2,191 are enrolled in the charitable or industrial institutions maintained by the State.

TABLE L.—*School attendance in State and incorporated institutions, 1904.*

Institutions in the State.	Institutions.	
	Number.	Attendance.
All institutions	53	19,725
Academies and seminaries	18	2,593
Denominational	9	2,489
Normal and business course	11	3,879
Professional	4	632
State { Charitable	5	2,191
State { Educational	6	7,941

The school attendance in the State and incorporated schools of Michigan, classified as to character of institution is given in Table L.

LITERACY AND ILLITERACY.

The literacy of the population of the State is determined upon the ability of all persons ten years of age and over to read and write, not necessarily the English language, but any language. The injury with respect to literacy, made by each census enumerator called for a definite answer (Yes or No) as to whether or not a person could read or write, and the tabulations derived from these returns presenting the literate and illiterate in the State June 1, 1904, are given in Tables XLV and XLVI of general tables. The illiterates are subdivided into two classes, namely, persons who can neither read nor write and persons who can read but cannot write; a presentation of which, classified by sex, general and parent-nativity, follows in general Tables XLVII, XLVIII, XLIX and L.

In reviewing the statistics of illiterates presented in these tables, the degree of illiteracy is ignored in figuring the proportions in the State; the designation "illiterate," comprehends all persons who can neither read nor write, or who can read but cannot write.

The population ten years of age and over returned for the entire area of enumeration in 1904, numbers 1,997,171, or 78.9 per cent, of the total population of the State. The literate comprise 1,927,781, or 96.5 per cent, of the entire population considered; the illiterate 69,390, or 3.5 per cent. The latter figures compared with the 80,482 illiterates reported in Michigan in the census of 1900, show a decrease of 11,092, or 13.8 per cent, in the past four years.

TABLE LI.—*Population ten years of age and over classified as to literacy, with number and per cent of total population.*

State.	Total population.	Population 10 years of age and over.	Literacy.		Per cent of total population.		Per cent of population 10 years of age and over.	
			Literate.	Illiterate.	Literate.	Illiterate.	Literate.	Illiterate.
STATE.....	2,530,016	1,997,171	1,927,781	69,390	76.9	2.7	96.5	3.5
Incorporated cities.....	1,036,249	826,447	801,164	25,283	79.7	2.4	96.9	3.1
Incorporated villages and rural districts.....	1,493,767	1,170,724	1,126,617	44,107	75.5	3.0	96.3	3.7

Of the total number of literates reported in the census of 1904, 990,382 are males, and 937,399 are females; of the illiterate persons the males constitute 37,998, and the females 31,392, the proportion ten years of age and over, and the proportion of illiterates being somewhat larger for the male than for the female population.

The number of persons returned in each of the two classes of illiterates, classified by sex, together with comparisons with similar proportions derived from the U. S. Census of 1900, is presented in Table LII.

TABLE LII.—*Illiterate population classified as to degree of illiteracy, 1900, 1904.*

State.	1904.					1900.				
	Aggregate.	Can read but cannot write.		Can neither read nor write.		Aggregate.	Can read but cannot write.		Can neither read nor write.	
		Number.	Per cent.	Number.	Per cent.		Number.	Per cent.	Number.	Per cent.
STATE.....	69,390	10,754	15.5	58,636	84.5	80,482	17,523	21.8	62,959	78.2
Male.....	37,998	4,789	12.5	33,209	87.5	43,224	7,980	18.5	35,244	81.5
Female.....	31,392	5,965	19.0	25,427	81.0	37,258	9,543	25.7	27,715	74.3

From these tabulations it will be seen 10,754, or 15.5 per cent, of the total illiterate population can read but cannot write, while the greater proportion 58,636, or 84.5 per cent, can neither read nor write, the latter class showing an increase in the past four years.

Of the whole number of illiterate persons in 1904, 18,886, or 27.2 per cent, consisting of 11,343 males and 7,543 females are of native birth and 50,504, or 72.8 per cent, 26,655 males and 23,849 females are foreign born. These figures as compared with those of 1894, of 35,273 native and 59,764 foreign, an aggregate of 95,037, show a decrease of 25,647, or 26.9 per cent, in the total illiterate population in the past decade. A distribution of the illiterate population, classified by general nativity for the State and counties, is given in Table LIII.

TABLE LIII.—*Total illiterate population ten years of age and over, classified by general nativity, counties.*

Foreign parents	49,992	26,398	52.9	23,594	47.1

The incorporated cities of the State contain 826,447, or 41.4 per cent, of the total population of the State, ten years of age and upwards. This population classified by sex consists of 393,095 literate and 12,153 illiterate males; 408,069 literate and 13,130 illiterate females. The number of females in the city population of this age, greatly outnumber the males, and the proportion of illiterate females exceeds that of males. Differing from the State as a whole, as compilations show that the total males, ten years of age and over, also illiterate males, are in excess of the females in both instances. Of the illiterate class in the cities, subdivided as to ability to read or write, 4,271, or 16.9 per cent, can read but cannot write, while 21,012, or 83.1 per cent, can neither read nor write.

In considering the general nativity of the city illiterate population, constituting 36.4 per cent, of the total number unable to read or write, tabulations show it is composed of 3,945, or 15.6 per cent, native element and 21,338, or 84.4 per cent, foreign. This, as will be seen from the following table classified as to parent-nativity, shows the illiterate population in the cities as well as the State is largely of foreign parentage.

TABLE LVI.—*General and parent-nativity of the illiterate population, classified by sex, incorporated cities.*

General and parent-nativity.	1904.				
	Total illiterate population 10 years of age and over.				
	Aggregate.	Males.		Females.	
		Number.	Per cent.	Number.	Per cent.
All cities	25,283	12,153	48.1	13,130	51.9

Foreign parents	21,199	10,114	47.7	11,085	52.3

ABILITY TO SPEAK ENGLISH.

The statistics relating to the ability of the persons ten years of age and over, to "speak English," are presented in detail for the counties and incorporated cities of the State in Tables LI and LII (pages 689-692) of general tables. In the subject considered, the presentation is limited to English speaking and non-English speaking persons, no report being made at the present census as to the languages spoken by non-English speaking persons.

TABLE LVII.—*Total population ten years of age and over, classified as to ability to speak English, number and percentages for 1904.*

State.	Persons of 10 years of age and over.						
	Aggregate.	Speak English.			Cannot speak English.		
		Number.	Per cent of total number.	Per cent of total English speaking.	Number.	Per cent of total number.	Per cent of total who cannot speak English.
STATE	1,997,171	1,940,812	97.2	100.0	56,359	2.8	100.0
Incorporated cities	826,447	799,514	96.7	41.2	26,933	3.3	47.8
Villages and rural districts	1,170,724	1,141,298	97.5	58.8	29,426	2.5	52.2

The proportion of the population of the State ten years of age and over in 1904, constitutes 1,940,812, or 97.2 per cent, English speaking persons, while 56,359, or 2.8 per cent, represent the non-English speaking element. This latter class, as compared with the persons unable to speak English reported for Michigan in the U. S. Census of 1900, 22,563 males and 29,524 females, an aggregate of 52,087 persons, shows an increase of 4,272, or 8.2 per cent, in this element in the past four years.

The number of English speaking persons in the State, comprising 1,002,264 males and 938,548 females, is fairly well divided between the sexes, although the number of English speaking males is somewhat in excess of that of females. This, however, seems to be offset by the increased number of non-English speaking females; this class, 26,116 males and 30,243 females, shows a larger proportion of females are unable to speak English.

TABLE LVIII.—*Non-English speaking population of the State, classified by sex, number and percentages, arranged geographically.*

Geographical divisions.	Cannot speak English.							
	Total population 10 years of age and over.	Total number 10 years of age and over who cannot speak English.	Males.			Females.		
			Number.	Per cent of total population.	Per cent of total number who cannot speak English.	Number.	Per cent of total population.	Per cent of total number who cannot speak English.
STATE	1,997,171	56,359	26,116	1.3	46.4	30,243	1.5	53.6
Southern counties	1,196,419	24,830	10,909	0.9	43.9	13,921	1.2	56.1
Central counties	353,283	6,591	2,727	0.8	41.4	3,864	1.1	58.6
Northern counties	245,441	6,410	2,819	1.2	43.9	3,591	1.4	56.1
Upper peninsula	202,028	18,528	9,661	4.7	52.2	8,867	4.3	47.8

In Tables LVIII is found a distribution of the non-English speaking element of the State by geographical divisions with percentages of same. From these tabulations it will be seen that the population of the State unable to speak English, as a natural consequence, is centered in a corresponding degree in that portion of the State containing the largest foreign element; these counties show not only the greater proportion of foreign element, but also, the increased proportion of illiterates.

In the incorporated cities we find 26,933 persons, or 1.4 per cent, of the total State population ten years of age and over, unable to speak English. This number also comprises 47.8 per cent of the entire number of persons of this age in the State unable to speak the English language. This element classified as to sex constitutes 11,495 males and 15,438 females, the excess of females in the non-English speaking class showing in the incorporated cities as well as in the State.

DEFECTIVE CLASS.

The classification of the defective persons of the State, is a difficult matter, and altogether satisfactory results are not possible, owing to the difficulties inherent in census work. In compiling the returns derived from the statements made by each census enumerator, the classification made by them has been closely adhered to. It is probable that to some extent, the epileptic are reported idiotic, and vice versa; the dumb many times are idiots, while no doubt the insane and epileptic persons, in like manner, have been wrongly reported. These misstatements, however, are of minor importance, in no way affecting the general classification of the total number. Tables LIII, LIV, LV, LVI, LVII, LVIII, LIX and LX of general tables consider in detail the defective class of the population of the State. From these tabulations we find the defectives of Michigan comprise 11,760 persons, 6,202 males and 5,558 females. These figures as compared with the State census of 1894, show an increase of 715, or 6.5 per cent, in the defective class of the population during the past ten years.

TABLE LIX.—*Number and per cent of defective class in the State, classified by general nativity.*

Defective class in the State.	Aggregate.	Native.		Foreign.	
	Total defectives.	Number.	Per cent.	Number.	Per cent.
All classes	11,760	7,911	67.3	3,849	32.7
Blind	1,349	890	65.9	459	34.1
Deaf and dumb	1,419	1,136	80.0	283	20.0
Dumb	176	140	79.5	36	20.5
Epileptic	923	750	81.3	173	18.7
Idiotic	1,798	1,576	87.6	222	12.4
Insane	6,095	3,419	56.1	2,676	43.9

In considering the general nativity of the defective persons, we find 7,911, or 67.3 per cent, are of native birth, and 3,849, or 32.7 per cent, are foreign, the per cent of native in each defect classified, exceeding that of the foreign element.

TABLE LX.—*Defective class, by age periods, for the State.*

Defective class.	Under 10.	10 to 15.	15 to 20.	20 to 25.	25 to 30.	30 to 35.	35 to 40.	40 to 45.	45 to 50.	50 to 60.	60 to 70.	70 to 80.	80 to 90.	90 and over.	Unk.
All ages	500	538	663	697	812	961	1,018	1,149	1,050	1,672	1,104	636	267	41	652

Insane	16	22	89	224	412	580	695	818	783	1,186	689	329	84	11	157

The ages, in periods of years, of the defective class of the population are presented in Table LX.

These tabulations show the greater proportion of this unfortunate class are of mature years; however, excluding the insane persons who are principally adults, we find nearly one-half of the defective population are below thirty years of age.

The parent-nativity of the defective persons in the State will be seen by referring to Table LXI.

TABLE LXI.—*Parent-nativity of the defective class in the State, 1904-1894.*

Parent nativity.	Number of defective persons.		Nativity of parents.								
			Native.	Foreign.	Foreign father, native mother.	Foreign mother, native father.	Father unknown.		Mother unknown.		Both unknown.
							Mother.		Father.		
	Native.	Foreign.					Native.	Foreign.	Native.	Foreign.	
STATE—1904	7,911	3,849	3,216	4,201	451	214	87	17	35	26	3,513
Males	4,125	2,077	1,665	2,267	227	121	44	7	15	14	1,842
Females	3,786	1,772	1,551	1,934	224	93	43	10	20	12	1,671
STATE—1894	7,470	3,575	3,275	3,418	439	301	76	15	33	14	3,474
Males	3,924	1,888	1,729	1,805	229	158	45	7	15	8	1,816
Females	3,546	1,687	1,546	1,613	210	143	31	8	18	6	1,658

While we have found the defective population constitutes a larger percentage of native element than foreign born, further compilations show the greater proportion of these persons are of foreign parentage.

Statistics relative to the conjugal condition of the defective persons are found in Table LXII.

TABLE LXII.—*Conjugal condition of the defective class in the State, classified as to sex and general nativity.*

Conjugal condition.	Defective persons.				
	Single.	Married.	Widowed.	Divorced.	Unknown.
STATE	5,902	3,331	1,081	170	1,276
Native	4,325	1,724	617	121	1,124
Male	2,510	749	192	46	628
Female	1,815	975	425	75	496
Foreign	1,577	1,607	464	49	152
Male	984	813	155	25	100
Female	593	794	309	24	52

The results to be derived from these figures show that the single constitute 50.2 per cent of the total number of defective persons; the married, 28.3 per cent; the widowed, 9.2 per cent; the divorced, 1.4 per cent; while 10.9 per cent belong to the number whose conjugal condition is unknown. A comparison of these figures with those of 1894, shows a decrease in the per cent of single and a slight increase in the married class, the proportions in the other conditions varying but little in the past ten years.

The defective class in the incorporated cities comprises 563 blind; 794, deaf and dumb; 86, dumb; 362, epileptic; 753, idiotic and 4,215 insane persons; in all, 6,773, or 57.5 per cent of the entire number of the defective population; 2,346 males and 2,206 females constitute the native element and 1,201 males and 1,020 females those of foreign birth; while the proportion of defectives of foreign parentage is much the same as for the entire State population of this class. The classification as to conjugal condition of these persons in the cities shows 3,147 single; 1,971, married; 579, widowed; 127, divorced, and 949 whose conjugal condition is unknown.

MICHIGAN-BORN.

The Michigan-born population constitutes a large percentage of the native element of the State. Of this number considered June 1, 1904, 1,586,524, or 80 per cent, are persons who are now living in the State of their birth, thus constituting the Michigan-born population; while 396,631, or 20 per cent, the remaining portion of this element, represents the amount of interstate migration that has taken place, native persons born elsewhere than in Michigan now residing in the State.

TABLE LXIII.—*Number and per cent of Michigan-born to total native population 1894-1900-1904.*

Census years.	Total native born.	Michigan-born.	
		Number.	Per cent.
1904	1,983,155	1,586,524	80.0
1900	1,879,329	1,455,615	77.4
1894	1,670,786	1,253,496	75.0

From the summary herewith presented it will be seen in the past decade the Michigan-born element shows an increased proportion of persons living in the State of their birth; a natural condition as the total native element of the State increases, and the foreign born population decreases.

In Table LXIV the Michigan-born population of the State is given with percentages of same to total, and native population, for the four *geographical divisions* of the State.

TABLE LXIV.—*Percentages of Michigan-born to total, and native population of the State, arranged geographically.*

Geographical divisions.	Total population.	Native population.	Michigan-born.		
			Michigan-born population.	Per cent of Michigan-born to total population.	Per cent of Michigan-born to native population.

The total population of the State, classified according to the number and percentage of persons born and living in the State, of other native born persons living in Michigan, and of foreign born persons, by counties arranged geographically is given in Table LXV.

These totals as compared with tabulations submitted by the U. S. Census of 1900 of 60.1 per cent, Michigan born, 17.5 per cent, native, and 22.4 per cent foreign born, show an increase in the Michigan born element, while the natives from other states living in Michigan, also the per cent of foreign element, mark a decrease in the past four years.

The conjugal condition of the Michigan-born population comprises 1,004,624, single; 519,924, married; 58,198, widowed; 3,129 divorced, and 649 persons whose conjugal condition is unknown. Of these persons 38.8 per cent of the single, 34.6 per cent of the married, 37.9 per cent of the widowed, 40.2 per cent of the divorced, and 52.2 per cent of the number reported as conjugal condition unknown, are located in the cities of the State. The Michigan-born population in the incorporated cities constitutes 593,427, or 78.1 per cent of the total native element located in the cities, or 37.4 per cent of the entire number of persons born in Michigan. Of this number born in Michigan and living in the cities of the State, 285,033 are males and 308,794 are females.

Table LXVI presents the total population in the ten large cities of the State, classified according to the number and percentage of persons born and living in the State, of other native born persons living in Michigan, and of the foreign born persons. Further statistics regarding the Michigan-born population will be found in Tables LXXI, LXXII, LXXIII and LXXIV (pages 728 to 735) of general tables.

AVERAGE NUMBER OF YEARS RESIDENCE IN MICHIGAN AND UNITED STATES.

In Tables LXXV and LXXVI of general tables is given the average number of years residence in Michigan and United States, of the inhabitants of the State. From these tabulations we find, June 1, 1904, the male element of the population averages 23 years residence in the State, and 26 years residence in the United States. The average number of years residence for the female element shows slightly less, 22 and 25 years, respectively.

In the incorporated cities of the State the average is still lower, the males averaging 20 and 24 years; while the females average number of years residence in Michigan is 21 years and in the United States 24 years.

COUNTRY OF BIRTH.

The foreign born population as returned June 1, 1904, numbers 546,861 persons. This element distributed according to countries of birth is found in Table LXVII.

TABLE LXVII.—*Foreign born population, distributed according to countries of birth, 1904.*

Countries of birth.	Rank.	Number born in specified countries.	Countries of birth.	Rank.	Number born in specified countries.
Foreign born	.....	546,861	Denmark	12	6,449
			Austria	13	6,185
			Russia	14	4,155
			Belgium	15	2,622
British America	1	183,689			
Germany	2	124,456	France	16	2,588
England	3	42,138	Switzerland	17	2,472
Poland	4	36,198	Bohemia	18	2,157
Holland	5	31,072	Hungary	19	1,013
			Wales	20	845
Ireland	6	28,575			
Sweden	7	26,438	Asia	21	483
Finland	8	19,057	China	22	249
Scotland	9	9,990	West Indies	23	186
Norway	10	7,532	Australia	24	137
Italy	11	7,053	Other countries	.....	1,122

It will be seen from the above table, of the foreign born element considered, the natives of British America, constituting both English and French Canadians, comprise the largest proportion of the foreign born population. Germany contributes the next largest percentage, while England ranks third. Poland, in which Poles of Austrian, German and Russian extraction are represented, marks the greatest per cent of increase of any nationality in the past decade.

In Table LXVIII the foreign born population distributed according to countries of birth is given for each county of the State.

TABLE LXVIII.—*Foreign born population, distributed according to principal countries of birth, by counties, 1904.*

DWELLINGS AND FAMILIES.

For census purposes the designation "dwelling" is comprehended as a place in which at the time of the census, one or more persons regularly sleep; not necessarily a house in the usual sense of the word, but it may be a room in a factory, store, or office building, a hotel, tenement or apartment house, as well as the ordinary dwelling. In accordance with this definition, the tabulations for 1904 show the whole number of dwellings occupied by one or more persons to be 559,989, an average of 4.5 persons to a dwelling, as compared with 4.6 in the U. S. census of 1900, and the State census of 1894. This average, as will be seen by the following table has in every instance but one been slightly less since the Federal census of 1880.

TABLE LXIX.—*Total number of dwellings and average number of persons to a dwelling in the State, 1880 to 1904.*

Census years.	Total population.	Total dwellings.	Persons to a dwelling.
1904	2,530,016	559,989	4.5
1900	2,420,982	521,648	4.6
1894	2,241,641	483,685	4.6
1890	2,093,889	434,370	4.8
1880	1,636,937	321,514	5.1

In Table LXXVII (pages 740-741) of general tables is given in detail for each county of the State, the number of dwellings, and the average number of persons to each dwelling. From these figures it will be seen the average number of persons to a dwelling varies in the several counties according to the condition of settlement and relative density of population in the different sections of the State.

In considering the families of the State, the word "family" used as a census term has a much wider application than it has in ordinary speech. It may stand for an individual living alone in any place of abode; for a group of individuals who occupy jointly a dwelling place or part of a dwelling place or for miscellaneous groups of persons lodging together, but having no family relationship. On this basis, the whole number of families enumerated at the census of 1904, is 589,314, an average of 4.3 persons to each family for the entire area of enumeration. As compared with 4.4 persons in 1900, this shows a decrease in the number of persons to each family since the last census. The number of families, and average number of persons to a family at the various census periods since 1880 is given in Table LXX.

TABLE LXX.—*Total number of families and average number of persons to a family in the State, 1880 to 1904.*

Census years.	Total population.	Total families.	Persons to a family.
1904	2,530,016	589,314	4.3
1900	2,420,982	548,094	4.4
1894	2,241,641	506,779	4.4
1890	2,093,889	455,004	4.6
1880	1,636,937	336,973	4.9

From these figures it will be seen the number of persons to each family has remained the same, or shown a decrease at each census enumeration since and including 1880, a condition corresponding to that of the occupied dwellings reviewed in the preceding schedule.

In Table LXXI is shown by geographical divisions for the State in 1904, the number of dwellings, and number of families with the excess of families over dwellings.

TABLE LXXI.—*Total number of dwellings and families, with excess of families over dwellings, by counties, geographically arranged.*

Geographical divisions.	Total population.	Total number of dwellings.	Total number of families.	Excess of families over dwellings.	
				Number.	Per cent of total families.
STATE	2,530,016	559,989	589,314	29,325	5.0
Southern counties	1,481,765	342,410	362,252	19,842	5.5
Central counties	451,157	101,458	103,683	2,225	2.1
Northern counties	321,569	67,964	70,443	2,479	3.5
Upper peninsula	275,525	48,157	52,936	4,779	9.0

It will be seen that the excess of families over dwellings at the present census is 29,325, which is 5 per cent, of the whole number of families reported. At the census of 1900 there was an excess of 26,446 families, equivalent to 4.8 per cent. In reviewing the various geographical divisions, the largest excess of families over dwellings is notable in the upper peninsula counties. This division shows an excess of 4,779 families over dwellings, or 9 per cent, of the total number of families in the division in 1904. A comparison of these percentages with the relatively small proportion of the other divisions shows the concentration of families in dwellings is principally confined to the northern section of the State, due largely to the character of its prevailing industry, and the presence in this portion of the State of a considerable foreign population living under urban conditions.

In Table LXXVIII (pages 742-743) of general tables is given for each incorporated city having 2,500 inhabitants or over, the number of dwellings, the number of families, and the average number of persons to each dwelling and family. These tabulations show the total population of

these cities considered, to be 1,008,830, constituting 231,999 families, occupying 210,605 dwellings, averaging 4.3 persons to a family and 4.8 persons to a dwelling. The excess of families to dwellings is shown in the following summary:

TABLE LXXII.—*Total number of dwellings and total number of families with excess of families over dwellings, incorporated cities.*

	Total population of cities having 2,500 inhabitants or over.	Total dwellings.	Total families.	Excess of families over dwellings.	
				Number.	Per cent of total families.
Cities	1,008,830	210,605	231,999	21,394	9.2

Table LXXIII gives for the ten large cities of the State, the population, total number of dwellings, and total number of families with average number of persons to each, together with comparative tables for 1894 and 1900, respectively.

TABLE LXXIII.—*Total number of dwellings and families with average number of persons to each, comparative tables, 1904, 1900, 1894.*

Cities.	1904					1900.					1894.

BIRTHS AND DEATHS.

The statistics relating to the births and deaths in the State for the year 1904, are given in Tables LXXIX and LXXX (pages 744-745) of general tables.

From these tables we find the number of births reported in the State to be 47,199, or 1.9 per cent of the total population. While the birth rate of the incorporated cities represents 21,597, or 2.1 per cent, of the total city population, and 45.8 per cent of the total number of births reported in the State.

The deaths occurring in the State as reported for the year ending June, 1904, number 36,868, a little less than one-half, or 16,555 of which are registered in the incorporated cities.

LIBRARIES.

The statistics collected relative to the libraries of Michigan, show that there are in the State, 6,639 libraries, with an aggregate of 3,468,041 volumes. These figures compared with the 3,124 general libraries containing 1,623,871 volumes reported in the census of 1894, show both the number of libraries and the number of volumes have more than doubled in the past ten years.

TABLE LXXIV.—*Number and classification of the libraries of the State.*

Classes.	Number of libraries.	Reference.	Circulating.	Number of volumes.
STATE	6,639	148	6,491	3,468,041
Public	90	2	88	1,010,351
Public school	259	20	239	518,447
School	4,681	100	4,581	1,228,935
Township	412	7	405	165,035
Society	159	14	145	185,898
Religious	1,038	5	1,033	359,375

Of the total number of libraries in the State reported, 90 are pubilc; 259 are connected with public schools; 4,681 are classified as school; 412 are township; 159, society, and 1,038 are religious. In considering the general classification of libraries the designation "Public" comprehends all supported wholly or partly by public funds; the designation "Public School" comprehends all connected with public schools; "School" comprehends all connected with private schools, district schools and colleges. "Township" comprehends all township libraries supported wholly or partly by public funds; "Society" those maintained

by societies, corporations, or associations; while the "Religious" comprehends all connected with churches or Sabbath schools. In these compilations, libraries owned by individuals, and strictly private, are not included, neither are libraries connected with the State traveling library recorded. The purely reference libraries in the State number 148, while 6,491 are reported as both circulating and reference. In the tabulations showing source of income or maintenance of the libraries of the State, we find the greatest number, 5,021, are maintained by public appropriation or direct taxation; 1,288 are supported by contributions or donations; 177 by corporations, while 153 receive their support from various sources not stated.

TABLE LXXV.—*Libraries in the incorporated cities, villages and rural districts, 1904.*

	Number of libraries.	Class.						Reference.	Circulating.	Number of volumes.	How supported.			
		Public.	Public school.	School.	Township.	Society.	Religious.				Taxation.	Donation.	Corporation.	Not reported.
STATE.....	6,639	90	259	4,681	412	159	1,038	148	6,491	3,468,041	5,021	1,288	177	153
Incorporated cities.....	596	54	69	15	1	75	382	36	560	1,834,487	133	382	79	2
Villages and rural districts	6,043	36	190	4,666	411	84	656	112	5,931	1,633,554	4,888	906	98	151

The incorporated cities of the State report 596 libraries containing 1,834,487 volumes. This number is made up of 54, public; 69, public school; 15, school; 1, township; 75, society and 382, religious (the latter class we have reason to believe has many times failed to be reported). Of the libraries located in the cities 133 are maintained by taxation; 382 by donation; 79 by corporations; while 2 fail to report means of support. The libraries in the cities which are both circulating and reference number 560, and those for reference only, number 36. Tables LXXXI and LXXXII (pages 746-749) of general tables give by counties, and the incorporated cities of the State, the record of public school, religious and society libraries as compiled for 1904.

CHURCHES.

The religious bodies embraced in the statistical results, derived from the census enumeration of 1904, relative to the churches of the State, have been classified under twenty-four distinct denominational titles. The classification "miscellaneous" includes independent congregations, mission chapels, and denominations reporting but one or two organizations.

While ecclesiastical bodies fall naturally into groups, or denomina*tional families,* no subdivision of associating branches in the same

family has been made. Thus all bodies that make the word "Methodist" a part of their name are considered as members of the Methodist family. In like manner the family branches of all other denominations are comprehended.

In Table LXXVI is given the denominational bodies in the State with the number of organizations, and relative rank of each denomination.

TABLE LXXVI.—*Order of denominations by number of organizations.*

Denominations.	Rank.	Number of organizations.	Denominations.	Rank.	Number of organizations.
Methodist	1	1,500	Christian	14	32
Roman Catholic	2	481	Latter Day Saints	15	26
Baptist	3	474	Universalist	16	25
Lutheran	4	421	Mennonite	17	22
Congregational	5	335	Dunkards	18	18
Presbyterian	6	255	Christian Science	19	17
United Brethren	7	165	Church of God	20	17
Evangelical	8	155	Friends	21	16
Protestant Episcopal	9	143	Jewish	22	9
Reformed	10	123	Unitarian	23	7
Adventist	11	89	Church of the New Jerusalem	24	2
Disciples of Christ	12	69	Miscellaneous	.....	144
Church of Christ	13	47			

The various religious bodies represented in Michigan compose 4,592 church organizations, with a total of 655,776 communicants. In the relative rank as regards organizations, it will be observed that the Methodist Episcopal church is first in number of organizations, but second in number of communicants, being exceeded by the Roman Catholic church. The Baptist denomination occupying third place in number of organizations, is surpassed by the Lutheran bodies in communicants. The Congregational, ranking fifth among church organizations in the State is excelled by the Presbyterians in point of membership. Table LXXVII gives by denominations the number of communicants and relative rank of each in the State.

TABLE LXXVII.—*Order of denominational families arranged according to number of communicants.*

Denominations.	Rank.	Communicants.	Denominations.	Rank.	Communicants.
Roman Catholic	1	237,746	Jewish	14	3,838
Methodist	2	113,026	Christian	15	3,027
Lutheran	3	75,126	Universalist	16	1,776
Baptist	4	49,185	Latter Day Saints	17	1,471
Presbyterian	5	32,299	Friends	18	1,172
Congregational	6	30,957	Dunkards	19	1,122
Reform	7	29,430	Unitarian	20	1,108
Protestant Episcopal	8	24,101	Mennonite	21	768
Evangelical	9	16,234	Christian Science	22	623
United Brethren	10	6,457	Church of God	23	454
Disciples of Christ	11	6,297	Church of the New Jerusalem	24	146
Adventist	12	5,232	Miscellaneous	.....	9,819
Church of Christ	13	4,361			

Of the church organizations in the State, 4,256 congregations own edifices, which have a seating capacity of 1,312,029; while 336 organizations report no building of their own.

An approximate estimate of the aggregate value of property owned by the various denominations enumerated in the census of 1904, is $25,215,250. In Table LXXVIII is presented the approximate value of property owned by each denomination, and relative rank of same.

TABLE LXXVIII.—*Order of denominations by value of church property.*

Denominations.	Rank.	Value of church property.	Denominations.	Rank.	Value of church property.
All denominations	.....	$25,215,250	Universalist	12	$199,200
			Adventist	13	158,750
			Unitarian	14	153,250
			Church of Christ	15	137,850
Roman Catholic	1	$6,130,600			
Methodist	2	4,993,300	Christian	16	94,200
Presbyterian	3	2,660,550	Jewish	17	81,800
Baptist	4	2,255,600	Christian Science	18	40,000
Congregational	5	2,165,900	Dunkards	19	32,850
			Friends	20	29,850
Protestant Episcopal	6	1,923,550			
Lutheran	7	1,898,250	Church of the New Jerusalem	21	18,000
Evangelical	8	699,300	Latter Day Saints	22	16,000
Reform	9	648,450	Church of God	23	13,800
United Brethren	10	245,550	Mennonite	24	13,250
Disciples of Christ	11	219,450	Miscellaneous	.....	385,950

There are reported 4,226 Sabbath schools, with a membership of 375,659 persons. Further statistics compiled at this census relating to the churches of the State will be found in Tables LXXXIII, LXXXIV, LXXXV and LXXXVI (pages 750-755) of general tables.

*In considering the general classification of libraries, the designation "public" comprehends all supported wholly or partly by public funds, while the designation "public school" comprehends all connected with public schools; "school" comprehends all connected with private schools, district schools and colleges; "township" comprehends all township libraries supported wholly or partly by public funds; "society" those maintained by societies, corporations or associations; "religious" all connected with churches or sabbath schools. Libraries owned by individuals, and strictly private, are not included.

(a) Includes State Public School.
(b) Includes Michigan School for Deaf.
(c) Includes Michigan College of Mines.
(d) Includes State Library.
(e) Includes Michigan School for the Blind, Industrial School for Boys and Michigan Agricultural College.
(f) Includes State Board of Health.
(g) Includes Central Michigan Normal School.
(h) Includes State Prison Library.
(i) Includes Michigan Asylum for Insane.
(j) Includes State Industrial School for Girls.
(k) Includes Northern State Normal School.
(l) Includes State House of Correction and Branch of State Prison in the Upper Peninsula.
(m) Includes University of Michigan and State Normal School.
